Series "A" of the Fund, denominated in the base currency of the Fund, has the following investor profile

Name of Fund	Base currency of Fund	Recommended minimum investment period (Series A)	Risk classification (Series A)
VIG MegaTrend Equity Investment Fund	EUR	6 years	5

The Fund is primarily intended for Investors who plan to invest for at least the recommended minimum investment period and who consider the indicated value on a scale of 1 to 7 of the risk/reward profile to be acceptable in light of their risk appetite.

The fund aims to profit from global megatrends that extend beyond economic cycles. Such trends may include demographic changes (ageing society, developing markets), efficiency gains due to scarce resources (renewable resources, energy efficiency), urbanisation, or even technological innovation. The fund aims to achieve its objectives through equity-type instruments, primarily exchange-traded funds (ETFs), equities and open-ended public investment funds. Megatrends are long-term changes that have a lasting impact on our social and economic environment. The fund aims to share in the profit growth of companies that could be winners in these processes. Megatrends are long-term processes that extend beyond normal economic cycles, are usually global and affect the whole world. Consequently, the fund does not have a geographical specification. As the fund aims to profit from long-term growth and has significant exposure to stock markets, it is recommended for risk-taking investors with a long-term investment horizon. The Fund holds its assets in euro. The Fund invests only in investments where the expense ratio remains below 2.5%, but always aims to keep the average fees charged on the underlying collective investment instruments below 1%. The fund also does not have a geographical specification, and thus no typical currency composition. The target currency of the Fund is therefore the settlement currency of the benchmark index (USD). Due to the strategy of the Fund, it may also invest in assets denominated in foreign currency. The Fund may hedge some or all of its foreign currency risk using forward currency positions against the target currency, i.e. the settlement currency of the benchmark (USD). The Fund Manager has a discretionary right to reduce the foreign currency risk of positions denominated in a currency other than the target currency, depending on market developments, by entering into hedge transactions. In addition, the use of equity and index futures is permitted in order to effectively build the Fund's portfolio.

The Fund Manager establishes a separate department to perform risk management and compliance tasks, with the risk management and compliance officer being responsible for its operation. Within the department, the risk management unit aims to develop risk management practices that are suitable for identifying, measuring, continuously monitoring and managing the Fund's risks. The procedures and rules applied ensure that the risk profile disclosed to investors is in line with the risk limits set out in the Fund's management regulations. As part of the risk management process, the risk management unit operates a limit system, which monitors, in separate subsystems, the legal, contractual and internal limits on the conclusion of individual transactions, the exposure to each partner, and the investment limits set by the Fund Manager in the Fund's management regulations and communicated to its investors. The Fund Manager applies a liquidity management system for the Fund to monitor the liquidity risks of the Fund and to ensure that the liquidity profile of the investments of the Fund comply with the obligations of the Fund.

XI. Use of leverage

The Fund may apply leverage only within the legal limits: The total net risk exposure of the investment fund may not be higher than twice the net asset value of the investment fund, i.e. the maximum leverage that may be applied by the Fund is 2. Fund concluded derivative transactions for hedging purposes and for efficient portfolio development. The Fund also concluded hedging transactions to reduce the foreign exchange risks of its various individual series against the base currency. The total netted risk exposure of the Fund as at 31 December 2023 was as follows: 1,13
