## VIII. Changes in the operations of the investment fund manager and major factors affecting developments in the investment policy

### The following major changes took place with regard to the operations of the Fund Manager

Vienna Insurance Group (VIG) has acquired the Hungarian business of Dutch Aegon after receiving the approval of the Hungarian authorities. The closing concerned the sale of two Dutch holdings (Aegon Hungary Holding B.V., Aegon Hungary Holding II B.V.), which were 100% owners of the shares of the Hungarian Aegon companies. On March 25, 2022, the Hungarian state holding Corvinus acquired a 45 percent ownership stake in VIG Group's Hungarian business.

As of March 23, 2022, the positions of Supervisory Board members Jane Philippa Louise Daniel, Hindrik Eggens, Olaf Adriaan Wilhelmus Johannes van den Heuvel were terminated, and Gerhard Lahner, Gábor Lehel and Gerald Weber were appointed at the same time. Based on the relevant permission of the Supervisory Authority, Dr. Andreas Grünbichler and Dr. Berta Adrienn and Mikesy Álmos are members of the supervisory board as of March 25, 2022, and as of March 29, 2022. On March 29, 2022, the Board of Directors added a new member in the person of Zsolt Kovács, while Gábor Réti's membership on the board of directors ceased on September 13, 2022.

In January 2022, compliance with the ESMA success fee calculation methodology directive was incorporated into the Fund's official documents. The above change did not affect the fund's investment policy.

In May 2022, in addition to maintaining the Fund's investment objective, the Fund Manager launched new currency-hedged series.

The fund aims to share the GDP growth of developing economies through stock price increases or dividend payments of listed companies directly (individual equity investments) or indirectly (ETFs, investment funds), taking into account environmental, social and governance (ESG) criteria. The geographical distribution is determined by MSCI's emerging market specification, in which, in addition to its significant Asian weight, AEGON HUNGARY FUND MANAGEMENT LTD

the size of European and Latin American companies is also emphasized. The use of forward equity and index futures is also permitted for the purpose of hedging and efficiently building the Fund's portfolio. Thus, there was a significant change in the equity composition of the portfolio during the year.

#### IX. Remuneration paid by the Fund Manager

(a)- (b) the total amount of remuneration, broken down by fixed and variable remuneration paid to employees and by employee category, with an indication of the number of beneficiaries

X. In respect of all EU AIFs distributed by the AIFM and all AIFs distributed by the AIFM in EEA countries, not including AIFMs referred to under Section 2, subsection (2),

*a) the share of the AIF's assets to which, due to their non-liquid nature, special rules apply:*

The share of non-liquid assets in the Fund, as defined in the Fund's Liquidity Policy, is 0,85%.

*b) all new agreements made in the relevant period relating to the liquidity management of the AIF,*

The Fund Manager did not conclude any new agreements in the reporting period in relation to the liquidity management of the Fund.

*c) Current risk profile of the AIF and the risk management systems applied by the AIFM to manage these risks.*

*Series "A" of the Fund, denominated in the base currency of the Fund, has the following investor profile:*

Name of Fund	Base currency of Fund	recommended minimum investment period (Series A)	risk classification
VIG Emerging Market ESG Equity Investment Fund	HUF	4 years	6 (high)

The Fund is primarily intended for Investors who plan to invest for at least the recommended minimum investment period and who consider the indicated value on a scale of 1 to 7 of the risk/reward profile to be acceptable in light of their risk appetite.

The fund aims to benefit from the economic growth of emerging countries. The fund achieves this objective primarily through individual equity investments, however, it may also hold collective investment instruments if this is justified for the efficient management of the portfolio. These may be, in particular, exchange-traded ETFs and open-ended public investment funds. In selecting shares, the Fund pays special attention to the compliance of individual companies with ESG criteria, so in addition to analyzing financial factors, portfolio managers also take environmental, social and corporate governance factors into account in the investment decision process. The Fund Manager seeks to build a portfolio in which the positive ESG characteristics of companies prevail, with a predominance of companies with high ESG ratios over those with low ESG ratios. The environmental criterion includes the elements during which a company comes into contact with the environment. This includes, for example, a company's energy use, waste management, pollutant emissions and the conservation of natural resources. Social criteria include all the relationships a company has with external partners, customers, and internal employees. Corporate governance criteria are the legal factors that affect the sound operation of a company. The Fund's main strategy is to provide broad emerging equity market exposure and to outperform the emerging market index through active equity market allocation. An active strategy allows you to achieve a surplus over the reference index. The risk exposure arising from the geographical distribution of the Fund is close to the benchmark.

The Fund Manager establishes a separate department to perform risk management and compliance tasks, with the risk management and compliance officer being responsible for its operation. Within the department, the risk management unit aims to develop risk management practices that are suitable for identifying, measuring, continuously monitoring and managing the Fund's risks. The procedures and rules applied ensure that the risk profile disclosed to investors is in line with the risk limits set out in the Fund's management regulations.

As part of the risk management process, the risk management unit operates a limit system, which monitors, in separate subsystems, the legal, contractual and internal limits on the conclusion of individual transactions, the exposure to each partner, and the investment limits set by the Fund Manager in the Fund's management regulations and communicated to its investors.

The Fund Manager applies a liquidity management system for the Fund to monitor the liquidity risks of the Fund and to ensure that the liquidity profile of the investments of the Fund comply with the obligations of the Fund.

**XI. Use of leverage**

The Fund may apply leverage only within the legal limits: The total net risk exposure of the investment fund may not be higher than twice the net asset value of the investment fund, i.e. the maximum leverage that may be applied by the Fund is 2. The Fund's investment policy has no other restrictions.

In the reporting period, the Fund concluded derivative transactions for hedging purposes and for efficient portfolio development. The Fund also concluded hedging transactions to reduce the foreign exchange risks of its various individual series against the base currency. The total netted risk exposure of the Fund as at 31 December 2022 was as follows: 1,07.
