

# VIG Developed Market Short Term Bond Investment Fund

EI series EUR MONTHLY report - 2024 JULY (made on: 07/31/2024)

## INVESTMENT POLICY OF THE FUND

The aim of the Fund is to increase the euro savings held in the Fund, while assuming low interest-rate and credit risk. The Fund mainly buys short-term, euro-denominated bonds of investment-grade issuers, and aims to generate a return for investors through interest income and price gains on them. The Fund Manager invests the savings held in the Fund in short-term bonds denominated in euros. The Fund Manager assumes a low interest-rate risk; the modified duration of the portfolio is more than 6 months, but may not be higher than 2.5 years. The Fund also follows a cautious strategy in terms of assuming credit risk, investing a maximum of just 10% of its assets in bonds of non-investment grade or non-credit rated issuers. The Fund primarily invests in developed-market government securities, but this can also be supplemented by credit-institution, corporate and/or municipal bonds, as well as by term deposits and repo transactions. The Fund can also invest a small part of its portfolio in emerging markets. In addition, the Fund may invest in collective investment forms, and can fine-tune the design of its portfolio through the use of derivatives (stock-exchange and OTC transactions). The Fund invests exclusively in securities denominated in euros, and may hold currency assets in bank deposits or bank accounts only for the purpose of liquidity management and currency hedging. It is not possible to make individual investor decisions in the Fund. No individual investor's decisions can be made in the Fund.

## MARKET SUMMARY

Early in the month, the ECB kept rates unchanged but seems like stays on track for another cut in the first month of autumn. Ursula von der Leyen was confirmed as president of the European Commission. The Republican convention nominated Donald Trump as its presidential candidate after the assassination attempt last month. Vice President Kamala Harris informally secured more delegates than the 1,976 needed for her to obtain the Democratic Party's nomination in the US presidential election. The EZ flash composite PMI for the last month surprised to the downside, indicating stalling activity at the beginning of Q3 '24. The German Ifo Business Climate Index fell significantly, with the deterioration being broad-based and the largest setback occurring in manufacturing. In the last week of July, the Fed kept rates on hold but indicated that it might cut rates at its next meeting. The BoE delivered a hawkish 25bp cut, while the BoJ continued to buck the global trend by hiking its policy rate to 0.25%. In the Eurozone, headline inflation inched higher, with core inflation stuck at 2.9% YoY, while GDP growth steadied at 0.3% QoQ in Q2 '24. Demand for core rates remained healthy, with Bund and UST yields declining by 15-25bp. The BTP-Bund spread widened. Focused on partly disappointing corporate earnings, the European stock market came under pressure, while the US market trod water. Credit spreads increased at the end of the month despite continued strong bank earnings. EUR-USD fell just below 1.08, while USD-JPY dropped below 150 following the BoJ's rate hike. EUR-HUF broke above 396, whereas EUR-CZK retreated from YTD highs. We adjusted bonds' selection in Austrian, Spanish, French and EU positions without meaningful changes of positioning as well as switched from Lithuania to Latvia, from Belgium to Netherlands and initiated positions in Slovak government bonds on better valuations, amid stayed positive towards asset class overall.
