■ VIG Developed Market Short Term Bond Investment Fund

UI series USD MONTHLY report - 2024 AUGUST (made on: 08/31/2024)

INVESTMENT POLICY OF THE FUND

The aim of the Fund is to increase the euro savings held in the Fund, while assuming low interest-rate and credit risk. The Fund mainly buys short-term, euro-denominated bonds of investment-grade issuers, and aims to generate a return for investors through interest income and price gains on them. The Fund Manager invests the savings held in the Fund in short-term bonds denominated in euros. The Fund Manager assumes a low interest-rate risk; the modified duration of the portfolio is more than 6 months, but may not be higher than 2.5 years. The Fund also follows a cautious strategy in terms of assuming credit risk, investing a maximum of just 10% of its assets in bonds of non-investment grade or non-credit rated issuers. The Fund primarily invests in developed-market government securities, but this can also be supplemented by credit-institution, corporate and/or municipal bonds, as well as by term deposits and repo transactions. The Fund can also invest a small part of its portfolio in emerging markets. In addition, the Fund may invest in collective investment forms, and can fine-tune the design of its portfolio through the use of derivatives (stock-exchange and OTC transactions). The Fund invests exclusively in securities denominated in euros, and may hold currency assets in bank deposits or bank accounts only for the purpose of liquidity management and currency hedging. It is not possible to make individual investor decisions in the Fund.

No individual investor's decisions can be made in the Fund.

MARKET SUMMARY

The US economy is slowing down, amid manufacturing and services sectors struggling, as indicated by the ISM surveys and reflected in labour market data. Consumers spending is shifting from services to more essentials. In the Eurozone, leading indicators suggest a marginal economic slowdown at the end of the second quarter, despite the positive trend continued. Germany's PMI indicates congestion, while France continues to shrink, although at a slower pace; Italy and Spain still expand, with Spain notably strong. Inflation decreased slightly to 2.5%, with core inflation steady at 2.9%, driven by service prices. Disinflation is expected to continue slowly. GDP growth in China slowed to 4.7% in Q2, below expectations. Retail sales decelerated, though industrial production exceeded expectations, supported by robust foreign demand. The Fed left its monetary policy unchanged but indicated that it might cut rates at its next meeting. The BoE delivered a hawkish 25bp cut, while the BoJ continued to buck the global trend by hiking its policy rate to 0.25%. Demand for govies remained strong, with Bund and UST yields declining further. The BTP-Bund and OAT-Bund spreads widened. Focused on partly disappointing corporate earnings, the European stock market came under pressure, while the US market trod water. Credit spreads increased at the end of the month despite continued strong bank earnings. We switched to Societe Generale corporate bonds from Deutsche Bank's on more pronounced valuations, added to the EU positions and relocated some duration from Italy and ESM into Slovakian government papers, amid stayed positive towards asset class overall.
