

VIG Alfa Absolute Return Investment Fund

A series HUF MONTHLY report - 2024 SEPTEMBER (made on: 09/30/2024)

INVESTMENT POLICY OF THE FUND

The aim of the fund is to achieve a substantial yield for investors by taking high risks and making active use of derivative positions. The Fund applies special investment strategies used by hedge funds to establish its strategy. The fund is willing to buy or sell all available investment instruments - domestic and foreign bonds (treasury bonds, discounted treasury bills, bonds issued by the National Bank of Hungary, as well as low-risk bank and corporate bonds expected to bring higher yields than the state securities) Equities and other securities, indices and currencies - provided it sees the opportunity to make substantial gains – up to the maximum limit allowed by the law, which allows double leverage for the Fund. In its investment decisionmaking mechanism, the Fund considers fundamental pricing, technical and behavioral psychological factors To ensure liquidity the Fund aims to hold government securities issued by the State Debt Management Centre (ÁKK) on behalf of the State of Hungary.

MARKET SUMMARY

US equity markets started September at near-peak levels in a seasonally weak September, but saw a significant correction in the middle of the month. The soft-landing narrative held at the beginning of the month as the inflation was lower than expected. Investors waited for the Fed rate decision with more attention than usual, and a 25 bps cut in line with the soft-landing was more likely at the beginning of the month. This was supported by positive macro data such as low inflation and GDP growth forecasts. However, the labor market data showed a worrying sign, with employment growth slowing down, leading the Fed to finally cut rates by 50 basis points. The stock market reacted positively to the higher cut. The decision contributed to a temporary weakening of the dollar and a decline in short term yields. In Hungary, the gradual moderation in inflation was a positive, but the slowdown in Hungarian exports, especially of automotive products, further worsened the economic outlook. The forint exchange rate fluctuated, mainly due to uncertainties surrounding international interest rate decisions. Overall sentiment was strongly influenced by the international economic slowdown and fears of a recession in Europe. Easing energy prices helped the Hungarian economy, but industrial production and domestic consumption remained under pressure, limiting the growth potential of markets. The MNB cut its base rate by another 25 basis points to 6.50%.

In September, the Fund continued to gain on the back of falling regional bond yields and a weakening forint. During the month, we took profits in Richter and OTP, but overall we slightly increased our equity weight by buying regional equities, although maintained our hedge position on the S&P500 index and increased our exposure to the weakening forint against USD and EUR. We have become more optimistic in the short term on the back of the Fed's 50-point rate cut and the Chinese capital market and economic stimulus, but we continue to see the greatest return potential in long regional EUR denominated government bonds, and we do not intend to change the Fund's risk level as the geopolitical situation continues to deteriorate.

GENERAL INFORMATION

Fund Manager:	VIG Investment Fund Management Hungary
Custodian:	Unicredit Bank Hungary Zrt.
Main distributor:	VIG Investment Fund Management Hungary
Benchmark composition:	Hurdle rate, annual 7%
ISIN code:	HU0000703970
Start:	02/10/2006
Currency:	HUF
Net Asset Value of the whole Fund:	50,447,289,273 HUF
Net Asset Value of A series:	22,972,634,977 HUF
