VIG BondMaxx Total Return Bond Investment Fund

E series EUR MONTHLY report - 2025 MARCH (made on: 03/31/2025)

VIG ASSET MANAGEMENT HUNGARY

INVESTMENT POLICY OF THE FUND

The Fund is a total return investment fund that aims to create a portfolio consisting of bond-type assets through active portfolio management that achieves annualised capital growth for investors higher than the benchmark over a 3-year time horizon. It intends to achieve this objective primarily through asset allocation in global bond markets.
The Fund invests exclusively in bond-type instruments. The Fund's investment universe focuses on developed market government bonds, developed market corporate bonds, local currency emerging market government bonds and hard currency emerging market government and corporate bonds. The primary source of return for the Fund is asset allocation across bond-type asset classes. The asset allocation is based on an “investment clock” approach that uses economic data analysis to determine the position of major regions within a growth cycle. This is complemented by the forecasting of expected movements in real interest rates and inflation expectations, which are also crucial for the allocation across bond markets. Portfolio managers use all these as the basis for making allocation decisions, overweighting the best performing bond asset class in any current economic cycle based on experience and expectations. In the investment process, portfolio managers optimise the interest rate and credit risk of the overall fund and of the exposures to individual bond markets in order to achieve the investment objective.

MARKET SUMMARY

Last month, the US exempted imports from Canada and Mexico that satisfy USMCA rules of origin requirements along with the imposition of 25% duties on steel and aluminium products, together with confirmation that 25% tariffs on US car imports were to be imposed from 2 April. Towards the end of the month, the prospect of global US tariffs was in focus with an announcement from President Trump due on 2 April. Markets suffered to keep up with various delays and exemptions, accompanied with numerous retaliatory announcements. Worries over US exceptionalism were heightened amid an array of soft survey data, and consumer sentiment tumbled. Optimism, though, was bright in certain parts of the world, most notably in Europe, thanks to plans for significant fiscal loosening. The European Commission relaxed fiscal rules to exempt defence spending of up to 1.5% of GDP and estimated this could create €650bn of fiscal space for defence over four years. Soon after German elections concluded with a result likely to lead to a renewed ‘grand coalition’ of the CDU/CSU and SPD, a massive fiscal programme of infrastructure and defence spending involving constitutional changes was passed, marking a fiscal sea-change. Core sovereign yields rose in except US Treasuries. 10y JGB yields saw the largest increase, while yields on US Treasuries experienced the biggest decline. Unlike previous easing cycles since four decades, where 10y US Treasury yields generally fell or saw only a modest increase, the recent surge is unusual. Global HY spreads widened the most in, driven primarily by the rise in USD HY spreads. In contrast, Global IG spreads remained largely unchanged, with USD IG widening and EUR IG tightening. January saw spread contraction across IG and HY in both USD and EUR credit. However, USD HY spreads widened significantly last month.
The fund still keeps its Ukrainian exposure (despite being adjusted in terms of securities selection on very strong performance), and waits for improvement in the Ukrainian-Russia war; we turned less positive on global EM at the end of the month and therefore relocated to Qatar from Argentina, bought Italian t-bills as well as added to the long positions 10y Bunds, further intention to keep or to cut the current exposure to the core rates and/or EM credit markets stays in place.

GENERAL INFORMATION

Fund Manager:	VIG Investment Fund Management Hungary
Custodian:	Raiffeisen Bank Zrt.
Main distributor:	VIG Investment Fund Management Hungary
Benchmark composition:	100% ESTR Compounded Index + 0.5%
ISIN code:	HU0000727037
Start:	09/14/2021
Currency:	EUR
