VIG BondMaxx Total Return Bond Investment Fund

I series HUF MONTHLY report - 2024 DECEMBER (made on: 12/31/2024)

INVESTMENT POLICY OF THE FUND

The Fund is a total return investment fund that aims to create a portfolio consisting of bond-type assets through active portfolio management that achieves annualised capital growth for investors higher than the benchmark over a 3-year time horizon. It intends to achieve this objective primarily through asset allocation in global bond markets.
The Fund invests exclusively in bond-type instruments. The Fund's investment universe focuses on developed market government bonds, developed market corporate bonds, local currency emerging market government bonds and hard currency emerging market government and corporate bonds. The primary source of return for the Fund is asset allocation across bond-type asset classes. The asset allocation is based on an “investment clock” approach that uses economic data analysis to determine the position of major regions within a growth cycle. This is complemented by the forecasting of expected movements in real interest rates and inflation expectations, which are also crucial for the allocation across bond markets. Portfolio managers use all these as the basis for making allocation decisions, overweighting the best performing bond asset class in any current economic cycle based on experience and expectations. In the investment process, portfolio managers optimise the interest rate and credit risk of the overall fund and of the exposures to individual bond markets in order to achieve the investment objective.

MARKET SUMMARY

Following a 50 basis points rate cut in September and a 25bp cut in November, the FOMC balloted to lower the federal funds target range by another quarter of percent to 4.25-4.50% range. Given the FOMC’s new dots projections against a setting of still strong GDP growth and sticky core inflation, the market now forecasts slower and fewer rate cuts ahead. Therefore, the December Fed meeting proved to be more hawkish than expected by the majority of the market participants. This prompted another rise in the U.S. Treasury yields and the U.S. Dollar, pressuring the long end of the curve, bond proxies and EM assets along. The rise in UST yields triggered a market environment, where virtually all asset classes have started to leak. Equity market breadth is already at very low levels though. Meanwhile, US growth expectations are being revised higher more aggressively, as are inflation expectations. Near-term earnings expectations for the S&P 500 are still low though.
Equity-to-bond yield correlations have moved into the negative again with markets being particularly sensitive to rising short-end rates - continued rises in bond yields without better growth might start to weigh more on equities and risky assets overall. Japanese equities have outperformed more than expected boosted by a much lower JPYUSD rate while EM and China equities performed poorly due to headwinds from weak macro data and tariffs. Within commodities oil has rallied while cyclical commodities such as Copper and Iron Ore suffered along with China assets. Gold has not suffered much from rising real yields. The Dollar broadly strengthened despite not weakening in November, in particular against cyclical G10 FX - this extends the 'stronger for longer' Dollar trend, which started in October and has come alongside rising implied FX vol.
The fund still keeps its Ukrainian exposure (despite being adjusted in terms of securities selection on very strong performance), and waits for improvement in the Ukrainian-Russia war; a relocation out of the CEE corporate credit (MFB) took place to Argentina as well as we turned positive on TIPs in December, further intention to keep or to add to the current exposure to the core rates and/or EM credit markets stays in place.

GENERAL INFORMATION

Fund Manager:	VIG Investment Fund Management Hungary
Custodian:	Raiffeisen Bank Zrt.
Main distributor:	VIG Investment Fund Management Hungary
Benchmark composition:	Hurdle rate, annual 6.5%
ISIN code:	HU0000709605
Start:	01/12/2011
Currency:	HUF
Net Asset Value of the whole Fund:	15,985,538,430 HUF
Net Asset Value of I series:	11,284,809,069 HUF
Net Asset Value per unit:	1.766696 HUF
