

VIG Developed Market Short Term Bond Investment Fund

El series EUR MONTHLY report - 2024 FEBRUARY (made on: 02/29/2024)

INVESTMENT POLICY OF THE FUND

The aim of the Fund is to increase the euro savings held in the Fund, while assuming low interest-rate and credit risk. The Fund mainly buys short-term, euro-denominated bonds of investment-grade issuers, and aims to generate a return for investors through interest income and price gains on them. The Fund Manager invests the savings held in the Fund in short-term bonds denominated in euros. The Fund Manager assumes a low interest-rate risk; the modified duration of the portfolio is more than 6 months, but may not be higher than 2.5 years. The Fund also follows a cautious strategy in terms of assuming credit risk, investing a maximum of just 10% of its assets in bonds of non-investment grade or non-credit rated issuers. The Fund primarily invests in developed-market government securities, but this can also be supplemented by credit-institution, corporate and/or municipal bonds, as well as by term deposits and repo transactions. The Fund can also invest a small part of its portfolio in emerging markets. In addition, the Fund may invest in collective investment forms, and can fine-tune the design of its portfolio through the use of derivatives (stock-exchange and OTC transactions). The Fund invests exclusively in securities denominated in euros, and may hold currency assets in bank deposits or bank accounts only for the purpose of liquidity management and currency hedging. It is not possible to make individual investor decisions in the Fund. No individual investor's decisions can be made in the Fund.

MARKET SUMMARY

Last month, the Eurozone composite PMI rose supported by a stronger services sector, while the contraction in German manufacturing deepened. The Ifo index improved somewhat, also supported by services. EU CPI in February decelerated less than forecasted amid sticky services prices, while the US core PCE deflator for January marked its strongest monthly rise over a year. Both data reinforce market's view that the ECB and the Fed are less likely to cut rates before June. In Japan, inflation data supported expectations that the BoJ is close to exiting negative rates. 10Y EGB yields were up around 10bp on the last week of February. Italy sold around EUR 18 billion of new BTP Valore Mar30, with robust demand from retail investors supporting the whole BTP market. EUR IG and HY spreads widened moderately amid strong supply. Equity markets were mixed. In FX, EUR-USD steadied close to 1.08, while the USD-JPY break below 150 was short-lived. In CEE, the HUF underperformed given the acceleration in NBH rate cuts and disputes over central bank independence. We added to the French, Italian, Portuguese, Spanish and Dutch positions and stayed positive towards asset class overall.
