

VIG Emerging Market ESG Equity Investment Fund

PI series PLN MONTHLY report - 2025 APRIL (made on: 04/30/2025)

INVESTMENT POLICY OF THE FUND

The aim of the Fund is to share in the performance of companies benefiting from the growth of developing economies, through share price increases or dividend payments of listed companies, either directly (through investments in individual stocks) or indirectly (through ETFs or mutual Funds), while taking environmental, social and governance (ESG) criteria into account. The Fund does not directly invest in shares of Chinese companies within the emerging market universe. The geographical distribution is partly determined by the MSCI Emerging Markets Ex China Index, in which, besides a significant Asian (ex China) focus, European and Latin American companies are also heavily represented, and partly by the MSCI World with Emerging Markets (EM) Exposure Index, in which American and European companies represent the greatest weight. The use of stock and index futures is permitted in order to hedge and effectively build the Fund's portfolio. In selecting the stocks, the Fund pays special attention to the ESG compliance of individual companies; therefore, besides analysing financial factors, portfolio managers also consider environmental, social and governance factors in the investment decision process. The Fund Manager seeks to build a portfolio in which the positive ESG characteristics of companies prevail, i.e. companies with high ESG scores are overrepresented in the portfolio as compared to companies with low ESG scores.

The environmental criterion covers the elements where a business interacts with the environment. This includes, for example, the energy usage, waste management, and emission of pollutants of corporations, as well as the preservation of natural resources. Social criteria include all relations of a corporation with external partners, customers and internal employees. Corporate governance criteria include the legal conditions affecting the reliable operation of a corporation.

Due to the strategy of the Fund, it may also invest in assets denominated in foreign currency. The Fund may hedge some or all of its foreign currency risk using forward currency positions against the target currency, i.e. the settlement currency of the benchmark (USD). The Fund Manager has a discretionary right to reduce the foreign currency risk of positions denominated in a currency other than the target currency, depending on market developments, by entering into hedge transactions. In addition, the use of equity and index futures is permitted in order to effectively build the Fund's portfolio. The Fund records its assets in Hungarian forint (HUF).

MARKET SUMMARY

The so called "Independence Day" on April 2nd was the biggest event of the month, when Donald Trump announced the long-awaited trade tariffs. The level of the tariffs was higher than the pessimistic scenarios, leading to a significant market sell off. Post-announcement tensions were eased by news of tariffs being postponed and negotiating initiatives by various countries, but the market remained depressed. Amid growing fears of a recession in the US economy, equity markets continued to show high volatility, with bond markets seeing the 10-year US Treasury yield rise to 4.6%. Recent quarterly reports, such as weak performances from UnitedHealth Group and Pepsi, warn that defensive sectors may also be struggling. Conversely, companies that get some sort of exemption from tariffs, such as Apple, may be able to outperform. As markets fall, several European investment institutions see the prospect of a recession as growing. Bond markets are expected to follow US trends and yields could rise on inflationary pressures. The defense and infrastructure sectors may continue to be more attractive as European economic stimulus measures could further boost the performance of these sectors.

Donald Trump's tariff announcements in April caused movements of historic proportions and a rollercoaster ride. At the beginning of the month, the US President announced "reciprocal tariffs" on imports from US trading partners, whereby the US imposes a tariff of at least 10% on all its trading partners (and even higher tariffs on some sixty countries with large trade surpluses with the US). Trump's announcements caused a major upheaval in markets, with volatility soaring, equity and bond markets both falling, the dollar also falling, and a coordinated outflow of capital from US assets. Sentiment became very pessimistic and bond yields rose sharply, which may have reached the pain threshold of policymakers, so Trump suspended tariffs for 90 days against countries that had not applied retaliatory tariffs against the US, a measure that triggered a sharp rise. However, a real give-and-take situation with tariffs has developed between China and the US, and the tariff war between these two countries has intensified the most, while the US administration has been less tough on Latin American countries. As a result, Mexican stocks even managed to rise in April, while Asian markets fell. The Fund was overweight in Central and Eastern European and Greek equities during April.
