

## INVESTMENT POLICY OF THE FUND

### MARKET SUMMARY

The result of the US presidential election was the main event that moved markets in November. Trump's victory can be explained, among other things, by the poor economic performance perceived by voters, who said that inflation and economic growth were the most important factors in their vote. This is interesting because the US economy is expanding at a steady 2.7% year-on-year rate, and inflation (2.6%) and unemployment are at low levels. Trump's election triggered a stock market rally on expectations of a looser regulatory environment and other business support measures. Bond yields reacted with a sharp rise on expected proposals by the President-elect to increase the public deficit, but this receded during the month. In general, markets have seen high volatility, driven by Trump's protectionist tariff policy plan and general policy uncertainties. The Fed's 25bp rate cut was in line with expectations, with analysts expecting a further rate cut by the end of the year. Economic growth in Europe remains relatively weak, but inflation is stabilizing at low levels. The US presidential election and Trump's draft tariff policy have had a negative impact on growth prospects in Europe, especially in the automotive sector. Since the beginning of May, the Sub-Fund's investment strategy has changed significantly. The new Sub-Fund aims to create a well-diversified equity fund that can benefit from the equity market performance of companies listed on stock exchanges in developed European countries. The Sub-Fund aims to achieve long-term capital growth through investments in European equity markets. The Fund achieved positive returns in November, but the relative weakness of European equities this year is outstanding, with the last time they underperformed their US peers to this extent was in 1995. This is driven by concerns over trade conflicts, the challenges in the Chinese market and the competitive environment, as well as subdued profit growth prospects. However, the relative underperformance is already starting to make European equities particularly attractive on the pricing side, as they have never before traded at such a discount to their US counterparts. In November, we have reduced the weight of French equities in the portfolio due to the political turmoil in France; the parties on either side of the French parliament could bring down Michel Barnier's government with a vote of confidence linked to the adoption of the budget, which could even result in a complete failure to achieve fiscal consolidation. The French index, thanks to the suffering of luxury goods manufacturers and local banks, has lagged behind the broad European index by a historic margin this year. In contrast, we have increased the weight of Spanish equities and the financial sector in the Fund.

### GENERAL INFORMATION

Fund Manager:	VIG Investment Fund Management Hungary
Custodian:	Raiffeisen Bank Zrt.
Main distributor:	VIG Investment Fund Management Hungary
Benchmark composition:	100% MSCI Europe Net Total Return EUR Index
ISIN code:	HU0000716105
Start:	03/07/2016
Currency:	HUF
Net Asset Value of the whole Fund:	1,033,490,706 HUF
Net Asset Value of A series:	378,595,606 HUF
Net Asset Value per unit:	1.387390 HUF
