

INVESTMENT POLICY OF THE FUND

MARKET SUMMARY

The US economy was hit by several headwinds in October. Macro data during the month, such as productivity growth and the downward trend in inflation, confirmed the robustness of the US economy. Better-than-expected unemployment and services data led to a strengthening of the dollar, breaking the previous weakening trend. The overall economic picture is beginning to resemble the coveted soft-landing narrative, which should give rise to optimism in markets. The equity market was driven most by the semiconductor and artificial intelligence sectors, with smaller market capitalization companies tending to move sideways. Oil prices rose earlier in the month on fears of escalation in the Middle East and have since moderated. In the bond markets, yields rose to multi-month highs as both presidential candidates are expected to add to already high government debt. Investors are now mostly looking forward to the presidential election on November 5th, and the subsequent Fed rate decision, of which the outcome will strongly determine the economic outlook. Since the beginning of May, the Sub-Fund's investment strategy has changed significantly. The new Sub-Fund aims to create a well-diversified equity fund that can benefit from the equity market performance of companies listed on stock exchanges in developed European countries. The Sub-Fund aims to achieve long-term capital growth through investments in European equity markets. In Europe, deflationary pressures from Chinese competition and depressed economic activity continued to weigh on many cyclical stocks in October, with the result that the price of many cyclical stocks suffered under the weight of weak demand, while IT and financial sector stocks performed relatively better. In addition, a group of European companies with the largest market capitalizations published their quarterly reports. Semiconductor equipment maker ASML reported a disappointing new order flow and cut its revenue expectations for next year. The company's CFO said there was still strong development and upside potential in artificial intelligence, but other segments were slower to recover - while Chinese customers, fearful of US sanctions, were likely to have brought forward their orders and were now ordering less. In contrast, SAP, the most valuable European technology company after ASML, has raised its annual profit forecast, driven by higher cloud revenues. Ahead of the US presidential election, we tended to play the wait-and-see game and did not hold significant positions against the benchmark.

GENERAL INFORMATION

Fund Manager:	VIG Investment Fund Management Hungary
Custodian:	Raiffeisen Bank Zrt.
Main distributor:	VIG Investment Fund Management Hungary
Benchmark composition:	100% MSCI Europe Net Total Return EUR Index
ISIN code:	HU0000734041
Start:	05/02/2024
Currency:	EUR
Net Asset Value of the whole Fund:	1,023,539,461 HUF
Net Asset Value of EI series:	1,573,067 EUR
Net Asset Value per unit:	1.012713 EUR
