

INVESTMENT POLICY OF THE FUND

MARKET SUMMARY

US equity markets started September at near-peak levels in a seasonally weak September, but saw a significant correction in the middle of the month. The soft-landing narrative held at the beginning of the month as the inflation was lower than expected. Investors waited for the Fed rate decision with more attention than usual, and a 25 bps cut in line with the soft-landing was more likely at the beginning of the month. This was supported by positive macro data such as low inflation and GDP growth forecasts. However, the labor market data showed a worrying sign, with employment growth slowing down, leading the Fed to finally cut rates by 50 basis points. The stock market reacted positively to the higher cut. The decision contributed to a temporary weakening of the dollar and a decline in short term yields. In Hungary, the gradual moderation in inflation was a positive, but the slowdown in Hungarian exports, especially of automotive products, further worsened the economic outlook. The forint exchange rate fluctuated, mainly due to uncertainties surrounding international interest rate decisions. Overall sentiment was strongly influenced by the international economic slowdown and fears of a recession in Europe. Easing energy prices helped the Hungarian economy, but industrial production and domestic consumption remained under pressure, limiting the growth potential of markets. The MNB cut its base rate by another 25 basis points to 6.50%.

Since the beginning of May, the Sub-Fund's investment strategy has changed significantly. The new Sub-Fund aims to create a well-diversified equity fund that can benefit from the performance of developed European equities. The Sub-Fund aims to achieve long-term capital growth through investments in European equity markets. In HUF terms, European stock markets posted a small positive performance in September, with the materials and real estate sectors performing well, while the healthcare and energy sectors significantly underperformed. News of a tighter-than-expected ECB, which expects inflation to rise and is therefore in no hurry to cut interest rates further, also put pressure on carmakers, with two major profit warnings from Mercedes and Volkswagen, both citing weaker demand and increasing price competition. Towards the end of the month, however, a major stimulus package arrived in China: the promise of a major fiscal stimulus on top of monetary stimulus also boost European companies whose revenues are partly derived from China, thus European luxury goods companies rose sharply.

GENERAL INFORMATION

Fund Manager:	VIG Investment Fund Management Hungary
Custodian:	Raiffeisen Bank Zrt.
Main distributor:	VIG Investment Fund Management Hungary
Benchmark composition:	100% MSCI Europe Net Total Return EUR Index
ISIN code:	HU0000734041
Start:	05/02/2024
Currency:	EUR
