

VIG Global Emerging Market Bond Investment Fund

I series HUF MONTHLY report - 2025 APRIL (made on: 04/30/2025)

INVESTMENT POLICY OF THE FUND

The Fund aims to achieve capital growth by investing in bonds of emerging European countries and state-owned companies. The Fund does not apply credit rating restrictions: it may purchase securities of any country or company with any long-term credit rating. The Fund aims for the highest possible capital growth alongside reasonable risk-taking. The Fund primarily purchases foreign currency emerging market bonds, in addition to which it holds Hungarian local currency short-term and long-term bonds for diversification and liquidity management purposes. The bond portfolio may also include short-term, long-term, fixed or floating-rate, structured and convertible bonds issued by mortgage credit institutions, other credit institutions, local governments or other business entities. The core of the Fund's investments is Central Eastern Europe (Hungary, Croatia, Poland, Romania, Slovakia, Ukraine), South East Europe (Serbia, Turkey), the Baltics (Latvia, Lithuania) and the Commonwealth of Independent States (Azerbaijan, Belarus, Kazakhstan, Russia, Georgia, Armenia) and bonds of majority state-owned companies, in addition to which the Fund holds short-term and long-term Hungarian government securities for diversification and liquidity management purposes. The target weight for bond exposures in the Fund in the 16 countries listed (target countries) is 95%. We do not set a limit on debt classification in the Fund. The Fund may only conclude derivative transactions for hedging purposes, or in the interest of establishing an efficient portfolio. The Fund may also hold non-leveraged bond-type collective investment forms. The Fund may also take on significant foreign currency exposure, which is normally covered 100% by the Fund Manager in the target currency (USD), but depending on market conditions, the Fund may also hold open foreign currency positions.

MARKET SUMMARY

The key event in April was the Trump administration's unexpected announcement on April 2nd of significantly higher "reciprocal" tariffs—some of which are temporarily paused for 90 days—while retaliatory tariffs on China have climbed to a steep 145%. Although this initially triggered a sell-off in financial markets and tighter financial conditions, those effects have somewhat eased. Both consumer and business confidence have dropped sharply, yet the limited hard data for April—such as low weekly initial jobless claims—suggests the economy hasn't experienced a dramatic downturn. Core PCE inflation for March likely remained modest at 0.1% month-over-month, though the ISM manufacturing price index has jumped and one-year consumer inflation expectations have surged. The Federal Reserve's dual mandate of maintaining 2% inflation and maximizing employment may soon come into conflict. In this context, the Fed has indicated it will assess how far the economy is from each target and the duration of that divergence when setting policy. Officials have expressed that monetary policy is currently well-positioned to remain on hold while awaiting more clarity. Assuming no recession, market expects the Fed to prioritize price stability and foresee just one rate cut this year, likely in Q4 2025. US Treasuries yield curve steepened further as 2Y yields decreased by c.30 bps along with increased 30Y yields by around 10 bps amid significant volatility during the month. German and British curves steepened as well but in a bull fashion as 2Y yields went down by more than 35 bps and 30Y ones by appr. 20 bps. In the current uncertain environment, gold added another 5% to its value ending the month at \$3,289/oz., posted all-time-high \$3,424/oz. in mid-Apr. EUR appreciated versus the U.S. Dollar by 4.7%, which is still unjustified by macroeconomic data. Risk assets have recovered a lot of the damage. The S&P 500 is now only down some 7.5% since its January peak, HY spreads have tightened some 100bp and IG credit is only about 25bp wider from the YTD tightens. Last month, we followed de-risking of the fund with decreasing exposure to the high-yielding names (specifically in the long-end of the curve), such as Colombia, Egypt, Romania, Turkey etc., and relocated to quality names of Saudi Arabia, Mexico, Peru and others; late last month we turned more constructive, therefore, further decrease of risky positions is unlikely.

GENERAL INFORMATION

Fund Manager:	VIG Investment Fund Management Hungary
Custodian:	Unicredit Bank Hungary Zrt.
Main distributor:	VIG Investment Fund Management Hungary
Benchmark composition:	Fund has no benchmark
ISIN code:	HU0000718408
Start:	12/30/2016
Currency:	HUF
