

## INVESTMENT POLICY OF THE FUND

The Fund's aim is to function as a stable, low-risk form of investment, while providing investors with higher returns than they could expect from bank deposits. In order to ensure liquidity, the Fund intends primarily to hold in its portfolio government bonds and discount treasury bills issued by the Government Debt Management Agency (ÁKK) and bonds issued by the National Bank of Hungary (MNB). The weighted average maturity (WAM) of the assets in the portfolio may not exceed 6 months and the weighted average life (WAL) of the assets may not exceed 12 months. The Fund may hold in its portfolio low-risk debt securities issued by banks and companies, which are expected to provide higher returns than government securities and are denominated primarily in HUF, but also in other currencies. The Fund may also invest to a limited extent in government securities or guaranteed bonds issued by the OECD or a G20 country, or any debt security issued or guaranteed by the central government or a regional or local government or the central bank of any EU Member State, or by the European Union, the European Central Bank or the European Investment Bank. The weighted average maturity (WAM) of the assets in the portfolio may not exceed 6 months and the weighted average life (WAL) of the assets may not exceed 12 months. In addition, the remaining time to maturity of each security is a maximum of 2 years and a maximum of 397 days until the nearest interest-rate determination date. The Fund may also keep its liquid assets in bank deposits. The fund may hold a limited amount of foreign currency assets in its portfolio, but only subject to the full hedging of currency risk.

VIG Moneymarket Fund is not a guaranteed investment. The risk of loss of the principal is to be borne by the investor. An investment in VIG Moneymarket Fund is different from an investment in deposits, with particular reference to the risk that the principal invested in VIG Moneymarket Fund is capable of fluctuation. VIG Moneymarket Fund does not rely on external support for guaranteeing the liquidity of the fund or stabilising the NAV per unit or share.

## MARKET SUMMARY

In April, inflation started to accelerate again, the year on year figure was 3,7%, which was in line with market expectations. Inflation is now largely driven by the price increases in the services sector, as the annual increase in food prices - which makes up the largest part of the consumer basket - is already close to zero, and there has been some normalization in fuel prices during the month due to government influence. During the April rate setting meeting, the central bank decreased the base rate by 50 basis points, bringing the base rate down to 7.75%. According to communication from Barnabás Virág, deputy governor of the central bank, this was the only scenario considered by the central bank, and a uniform decision was reached during the meeting. This marked a new phase in monetary policy, with the pace of rate cuts slowing down. It was emphasized that there will be no rush to further easing, and a realistic scenario is still expected to maintain the central bank's base rate at 6.75-7% by mid-year, but patience is needed as inflation may resume its upward trajectory from May onwards. However, there will be very limited room for further rate cuts in the second half of the year, so it is possible that the central bank will reach the terminal rate by mid-year for 2024. At the beginning of the month, the previously introduced deposit rate cap and the purchase ban on the central bank discount bonds were not extended, so institutional investors also gained access to yield levels close to the base rate from April. However, this pushed short-term discount bill yields higher during the month, resulting in a 20 basis point increase in average yield at the 3- and 6-month T-bill auctions, and a 10 basis point increase at the annual T-bill auctions.

## GENERAL INFORMATION

Fund Manager:	VIG Investment Fund Management Hungary
Custodian:	Unicredit Bank Hungary Zrt.
Main distributor:	VIG Investment Fund Management Hungary
Benchmark composition:	100% ZMAX Index
ISIN code:	HU0000718135
Start:	12/01/2016
