

VIG Developed Market Short Term Bond Investment Fund

EI series EUR MONTHLY report - 2025 MAY (made on: 05/31/2025)

INVESTMENT POLICY OF THE FUND

The aim of the Fund is to increase the euro savings held in the Fund, while assuming low interest-rate and credit risk. The Fund mainly buys short-term, euro-denominated bonds of investment-grade issuers, and aims to generate a return for investors through interest income and price gains on them. The Fund Manager invests the savings held in the Fund in short-term bonds denominated in euros. The Fund Manager assumes a low interest-rate risk; the modified duration of the portfolio is more than 6 months, but may not be higher than 2.5 years. The Fund also follows a cautious strategy in terms of assuming credit risk, investing a maximum of just 10% of its assets in bonds of non-investment grade or non-credit rated issuers. The Fund primarily invests in developed-market government securities, but this can also be supplemented by credit-institution, corporate and/or municipal bonds, as well as by term deposits and repo transactions. The Fund can also invest a small part of its portfolio in emerging markets. In addition, the Fund may invest in collective investment forms, and can fine-tune the design of its portfolio through the use of derivatives (stock-exchange and OTC transactions). The Fund invests exclusively in securities denominated in euros, and may hold currency assets in bank deposits or bank accounts only for the purpose of liquidity management and currency hedging. It is not possible to make individual investor decisions in the Fund. No individual investor's decisions can be made in the Fund.

MARKET SUMMARY

Recent high-frequency data has shown encouraging signs, including indicators such as global shipping activity, corporate guidance and earnings revisions in the United States, and select macroeconomic releases. While considerable uncertainty remains regarding the implications of the recent tariff suspensions, two important dynamics are evident: 1/ These pauses offer markets a temporary period of relief, during which investors may be more inclined to discount weaker hard data; and 2/ Market participants have increasingly come to understand that, despite the initially uncompromising stance of the U.S. administration, a de facto policy backstop exists.

For example, just last week, markets absorbed a series of adverse developments—including the downgrade of U.S. sovereign debt, the imposition of additional EU/U.S. tariffs, and heightened concerns over U.S. fiscal sustainability—yet risk assets have already demonstrated notable resilience. We increased exposure to the Italian government bonds positions, other positions remained unchanged, amid stayed positive towards asset class overall.
