

## INVESTMENT POLICY OF THE FUND

The Fund's goal is to achieve capital growth through active portfolio management by investing in green bonds issued by governments and corporations in developed and emerging markets, while also advancing the Fund's sustainability objectives. The Fund Manager integrates sustainability risks and their management into the Fund's investment decision-making process. The Fund aims to promote environmental and/or social characteristics and pursues sustainable investment, thereby falling under Article 9 of the SFDR regulation. The Fund's credit rating restriction is that it may only purchase bonds with an investment-grade rating. With a reasonable risk approach, the Fund seeks the highest possible capital growth, primarily through asset allocation in green bonds available in global bond markets. The Fund's investment strategy is built on sustainable value creation, aiming to develop an actively managed, well-diversified portfolio that considers both sustainability criteria and the fundamentals of its assets. To achieve this, it primarily invests in developed market green corporate and government bonds issued in foreign currencies, and may also hold emerging market green corporate and government bonds. The bond portfolio may also include short- and long-term, fixed or variable rate bonds issued by mortgage banks, other financial institutions, municipalities, or other economic organizations. The Fund's goal is sustainable investment, which it plans to achieve primarily, though not exclusively, through a positive environmental impact within the ESG universe. In pursuit of this, it mainly intends to invest in bonds from countries with low greenhouse gas emission intensity, a strong exercise of civil liberties, and low rates of social violations. Additionally, the Fund plans to invest in bonds of companies with a low ecological footprint, contributing through their activities to solving global environmental issues, such as the transition to a low-carbon economy or a circular economic model. The Fund may hold assets with exposures differing from the base currency up to 100%. The Fund Manager generally hedges currency exposures to the target currency (EUR) at 100%, but may also hold open currency positions depending on market expectations. The Fund invests at least 80% in assets issued and traded outside Hungary.

## MARKET SUMMARY

Recent high-frequency data has shown encouraging signs, including indicators such as global shipping activity, corporate guidance and earnings revisions in the United States, and select macroeconomic releases. While considerable uncertainty remains regarding the implications of the recent tariff suspensions, two important dynamics are evident: 1/ These pauses offer markets a temporary period of relief, during which investors may be more inclined to discount weaker hard data; and 2/ Market participants have increasingly come to understand that, despite the initially uncompromising stance of the U.S. administration, a de facto policy backstop exists.

For example, just last week, markets absorbed a series of adverse developments—including the downgrade of U.S. sovereign debt, the imposition of additional EU/U.S. tariffs, and heightened concerns over U.S. fiscal sustainability—yet risk assets have already demonstrated notable resilience. The fund's allocation remained stable, reflecting our continued constructive outlook on the asset class as a whole.

## GENERAL INFORMATION

Fund Manager:	VIG Investment Fund Management Hungary
Custodian:	Erste Bank Hungary Zrt.
