

INVESTMENT POLICY OF THE FUND

The Fund's objective is to establish a portfolio for its Investors that generates positive returns – higher than the yields available on the domestic money market – under all circumstances, i.e. the Fund pursues a "total return" strategy. The Fund seeks to achieve this goal by selecting, through various analytical techniques, the asset classes and investment funds that have the greatest price growth potential and make investments through the purchase of investment units and collective investment securities. The Fund invests primarily in investment funds managed by VIG Befektetési Alapkezelő Magyarország Zrt., but may also purchase other investment funds and collective investment securities in its portfolio for diversification purposes or if the given asset class is not yet covered by the Fund Manager's funds. In order to ensure liquidity, the Fund may hold in its portfolio discount treasury bills and government bonds issued by the Government Debt Management Agency (ÁKK), interest-bearing securities guaranteed by the Hungarian State, and bonds issued by the MNB. As the range of possible investments includes investments denominated in foreign currency, ETFs and investment units, the Fund's investors may also bear some foreign exchange risk. According to the Fund's investment policy, it invests or may invest more than 80 percent of its assets in investment units or other securities issued by a collective investment undertaking. However, the Fund does not intend to hold more than 20% weight in any one investment fund, except for the VIG Hungarian Money Market Fund, VIG Hungarian Bond Fund, VIGMoneyMaxx Emerging Market Total Return Fund, VIG Alfa Absolute Investment Fund, VIG Bondmaxx Total Return Bond Fund, VIG Maraton ESG Multi Asset Fund, VIG Panoráma Total Return Fund and VIG Ózon Annual Capital Protected Fund, the weight of which may be as much as 100% within the Fund's portfolio.

MARKET SUMMARY

The US stock market rose in May, supported by strong reports from large technology companies and a technical rebound from low positioning. The S&P 500 index's multi-day rally and persistent buying by retail investors signaled positive sentiment, but this was not matched by institutional interest, with large investment funds tending to wait and see. The market was negatively affected by the intensification of the trade war rhetoric, Donald Trump's tariff threats and the Fed's monetary wait-and-see approach. Although service sector and labor market data remained strong, some macroeconomic indicators and the slowdown in retail consumption are cause for concern. Most GDP estimates point to a decline, and the Fed has also adopted a wait-and-see stance. In the words of the chairman of the Federal Reserve, 'waiting costs nothing'.

In Europe, stock markets, especially the German market, have outperformed, supported by algorithmic buying, a strong euro and a weak dollar. However, economic data does not paint a uniform picture: inflationary pressures in France and Germany are easing, which could give the European Central Bank room to cut interest rates, but important macroeconomic indicators have declined in several countries (e.g. France, Italy). Domestic political uncertainties in Germany, which culminated in difficulties surrounding Merz's election, caused temporary turmoil, but the markets did not react with a panic. According to interest rate market expectations, the European Central Bank will begin cutting interest rates later this year.

The Fund's net asset value continued to rise modestly in May. The equity market rebound—initiated in early April following tariff-related announcements carried on throughout the month. This was supported by positive developments on the tariff front, the unwinding of negative positioning, a reduction in institutional underweights, and stronger-than-expected macroeconomic data and corporate earnings releases. Performance across our absolute return strategies was primarily driven by equity positions and short-duration bond exposures, both of which contributed meaningfully to returns in May.
