

# VIG Developed Market Short Term Bond Investment Fund

U series USD MONTHLY report - 2025 JUNE (made on: 06/30/2025)

## INVESTMENT POLICY OF THE FUND

The aim of the Fund is to increase the euro savings held in the Fund, while assuming low interest-rate and credit risk. The Fund mainly buys short-term, euro-denominated bonds of investment-grade issuers, and aims to generate a return for investors through interest income and price gains on them. The Fund Manager invests the savings held in the Fund in short-term bonds denominated in euros. The Fund Manager assumes a low interest-rate risk; the modified duration of the portfolio is more than 6 months, but may not be higher than 2.5 years. The Fund also follows a cautious strategy in terms of assuming credit risk, investing a maximum of just 10% of its assets in bonds of non-investment grade or non-credit rated issuers. The Fund primarily invests in developed-market government securities, but this can also be supplemented by credit-institution, corporate and/or municipal bonds, as well as by term deposits and repo transactions. The Fund can also invest a small part of its portfolio in emerging markets. In addition, the Fund may invest in collective investment forms, and can fine-tune the design of its portfolio through the use of derivatives (stock-exchange and OTC transactions). The Fund invests exclusively in securities denominated in euros, and may hold currency assets in bank deposits or bank accounts only for the purpose of liquidity management and currency hedging. It is not possible to make individual investor decisions in the Fund. No individual investor's decisions can be made in the Fund.

## MARKET SUMMARY

The US stock markets were driven by conflicting events during the month. On the one hand, favorable corporate results (e.g. Apple, Nvidia) and a court ruling that partially invalidated punitive tariffs had a positive impact on the markets. The Nasdaq Composite index closed at new highs. On the other hand, the war between Israel and Iran and strong government communication aimed at reinstating tariffs were negative factors. The dollar weakened due to unfavorable US macro data, while bond yields declined overall. However, declining volatility had a positive effect, encouraging investors to increase their positions and resulting in record capital inflows into the United States. European capital markets were initially positively affected by the expected interest rate cut by the European Central Bank (ECB). Inflation data for May, particularly in Germany and France, were lower than expected, further reinforcing expectations of monetary easing. However, investor optimism was tempered by the continued weakness of the European manufacturing sector, particularly the decline in the automotive industry. The outlook for the economically significant German economy remains unfavorable, as indicated by continued factory closures and layoffs. On a positive note, however, the United Kingdom received further tariff exemptions from the United States on steel and aluminum products, supporting the price of British industrial stocks.

Over the past month, we continued to overweight the portfolio's interest rate risk. Eurozone inflation remained below the European Central Bank's 2% inflation target in May and June, so further interest rate cuts are expected in the second half of the year, which is also supportive for the eurozone bond market. In terms of the fund's positions, we replaced part of the short-term French government bonds with French government bonds maturing in 2030.

## GENERAL INFORMATION

Fund Manager:	VIG Investment Fund Management Hungary
Custodian:	Raiffeisen Bank Zrt.
Main distributor:	VIG Investment Fund Management Hungary
Benchmark composition:	Fund has no benchmark
