

INVESTMENT POLICY OF THE FUND

The fund aims to profit from global megatrends that extend beyond economic cycles. Such trends may include demographic changes (ageing society, developing markets), efficiency gains due to scarce resources (renewable resources, energy efficiency), urbanisation, or even technological innovation. The fund aims to achieve its objectives through equity-type instruments, primarily exchange-traded funds (ETFs), equities and open-ended public investment funds. Megatrends are long-term changes that have a lasting impact on our social and economic environment. The fund aims to share in the profit growth of companies that could be winners in these processes. Megatrends are long-term processes that extend beyond normal economic cycles, are usually global and affect the whole world. Consequently, the fund does not have a geographical specification. As the fund aims to profit from long-term growth and has significant exposure to stock markets, it is recommended for risk-taking investors with a long-term investment horizon. The Fund holds its assets in euro. The Fund invests only in investments where the expense ratio remains below 2.5%, but always aims to keep the average fees charged on the underlying collective investment instruments below 1%. The fund also does not have a geographical specification, and thus no typical currency composition. The target currency of the Fund is therefore the settlement currency of the benchmark index (USD). Due to the strategy of the Fund, it may also invest in assets denominated in foreign currency. The Fund may hedge some or all of its foreign currency risk using forward currency positions against the target currency, i.e. the settlement currency of the benchmark (USD). The Fund Manager has a discretionary right to reduce the foreign currency risk of positions denominated in a currency other than the target currency, depending on market developments, by entering into hedge transactions. In addition, the use of equity and index futures is permitted in order to effectively build the Fund's portfolio.

MARKET SUMMARY

In June, the Fund's investment universe continued to rise and the dollar continued to weaken. The performance of the US stock market was supported by a number of factors last month. These include favorable corporate earnings (Oracle), heightened expectations of interest rate cuts, and the earnings growth advantage for large-cap companies resulting from the weakening of the dollar. In addition, lower realized volatility encouraged algorithmic strategies to expand their positions, while falling energy prices and the resurgence of the long-term growth narrative linked to artificial intelligence also contributed to the positive sentiment. On the other hand, the war between Israel and Iran and strong government communication aimed at restoring tariffs were negative factors. Despite this, the Nasdaq Composite index closed at new highs. A significant portion of the AI infrastructure sector showed relative strength again, but Mastercard and Visa's share prices fell after a WSJ article reported that many retailers are planning to bypass them and set up a stablecoin-based payment system due to high card fees. In addition to our artificial intelligence investments, our uranium mining, social media, and video game stocks also performed particularly well during the month.

GENERAL INFORMATION

Fund Manager:	VIG Investment Fund Management Hungary
Custodian:	Unicredit Bank Hungary Zrt.
Main distributor:	VIG Investment Fund Management Hungary
Benchmark composition:	100% MSCI AC World Daily Total Return Net USD Index
