

VIG Central European Equity Investment Fund

B series EUR MONTHLY report - 2025 JULY (made on: 07/31/2025)

INVESTMENT POLICY OF THE FUND

The aim of the Fund is to invest on the stock market of the Central and Eastern European Region. It is for investors who would like a share in the long-term performance of listed companies in the region. In the development of the portfolio of this Fund, the priority is to optimise the aggregate risk of the securities added to the Fund. In order to reduce risks, the Fund Manager exercises the highest degree of diligence when selecting the securities to be included in the portfolio. It analyses the risk factors of the securities, and supports its decisions with in-depth calculations.

The Fund purchases stocks issued by companies in Central and Eastern European region (primarily Hungary, the Czech Republic, Poland, Austria, Romania, secondarily Slovenia, Croatia, Slovakia), but it may also invest in the stocks of other developing and developed foreign companies as well as other collective investment securities. Due to the strategy of the Fund, it may also invest in assets denominated in foreign currency. The Fund may hedge some or all of its foreign currency risk using forward currency positions against the target currency. The Fund Manager has the discretionary right to reduce the foreign currency risk of the currency positions differing from the Fund's target currency, based on the market processes by concluding hedge transactions. In addition, the use of equity and index futures is permitted in order to effectively build the Fund's portfolio. To ensure liquidity, the Fund wishes to add government securities issued by member states of the EU, OECD, or G20 to its portfolio.

MARKET SUMMARY

Several factors supported the rise of the US stock market in July: the weakening of the dollar, algorithmic position building due to declining realized volatility, and the continued strong growth narrative in the technology sector, particularly among AI and semiconductor companies. The economic slowdown – for example, weak consumer spending and labor market data, as well as low private sector growth estimates by ADP Research, the global leader in employment performance measurement – did not cause panic.

The passage of the budget bill known as the "Big Beautiful Bill" provided a significant fiscal stimulus, which supported the stock market in the short term but raised concerns among bond market investors about the already controversial sustainability of public debt in the longer term. The yield on the 10-year US government bonds rose, along with the rest of the yield curve, reflecting uncertainty about the solvency of the government.

European markets showed similarly mixed performance. Favorable developments in trade negotiations supported stock indices, but bond markets saw a significant sell-off, mainly due to expectations of a slowdown in interest rate cuts by the European Central Bank. Inflation rose slightly but remains around the 2% target. The ECB's communication remained cautious, but Vice-President De Guindos warned of the dangers of the EUR/USD rate reaching 1.20, which somewhat halted the euro's appreciation.

Central European regional equities closed an extremely strong month, continuing the upward trend that has been ongoing since the beginning of the year. This time, the Austrian and Slovenian markets rose the most, the former mainly due to Erste's strong performance, while the latter saw a very broad-based rise. At the sector level, consumer staples, financials and healthcare performed exceptionally well. In contrast, the raw materials and retail sectors ended the month in negative territory. The banking sector continues to report strong results, while other sectors reported mixed results. The Fund's equity weighting rose to 105% by the end of the month, and we remain confident in the strong performance of the Hungarian and Polish markets.

GENERAL INFORMATION

Fund Manager:	VIG Investment Fund Management Hungary
Custodian:	Erste Bank Hungary Zrt.
Main distributor:	VIG Investment Fund Management Hungary
Benchmark composition:	100% CETOP 5/10/40 Index
