

INVESTMENT POLICY OF THE FUND

MARKET SUMMARY

The US stock market rose in May, supported by strong reports from large technology companies and a technical rebound from low positioning. The S&P 500 index's multi-day rally and persistent buying by retail investors signaled positive sentiment, but this was not matched by institutional interest, with large investment funds tending to wait and see. The market was negatively affected by the intensification of the trade war rhetoric, Donald Trump's tariff threats and the Fed's monetary wait-and-see approach. Although service sector and labor market data remained strong, some macroeconomic indicators and the slowdown in retail consumption are cause for concern. Most GDP estimates point to a decline, and the Fed has also adopted a wait-and-see stance. In the words of the chairman of the Federal Reserve, 'waiting costs nothing'.

In Europe, stock markets, especially the German market, have outperformed, supported by algorithmic buying, a strong euro and a weak dollar. However, economic data does not paint a uniform picture: inflationary pressures in France and Germany are easing, which could give the European Central Bank room to cut interest rates, but important macroeconomic indicators have declined in several countries (e.g. France, Italy). Domestic political uncertainties in Germany, which culminated in difficulties surrounding Merz's election, caused temporary turmoil, but the markets did not react with a panic. According to interest rate market expectations, the European Central Bank will begin cutting interest rates later this year.

The Equity Sub-Fund delivered a modest positive return in May. During the month, the price of gold attempted to break out to new all-time highs but encountered strong selling pressure. From its peak, gold declined by nearly 6%, although it found support at a key technical level and did not fall further. The key question going forward is how much political and economic uncertainty is already priced into gold. In our view, gold has moved somewhat ahead of itself relative to underlying fundamentals. Therefore, we remain cautious about the coming months and do not rule out a potential correction in the price—possibly even down to the \$2,800 level.

GENERAL INFORMATION

Fund Manager:	VIG Investment Fund Management Hungary
Custodian:	Raiffeisen Bank Zrt.
Main distributor:	VIG Investment Fund Management Hungary
Benchmark composition:	Fund has no benchmark
ISIN code:	HU0000734959
Start:	04/30/2024
Currency:	EUR
Net Asset Value of the whole Fund:	9,177,413,168 HUF
Net Asset Value of EI series:	1,108,018 EUR
Net Asset Value per unit:	1.329679 EUR
