

INVESTMENT POLICY OF THE FUND

MARKET SUMMARY

Hungarian inflation in July starts to decline again based on the market expectations. The lower figure was largely supported by the higher base from last year, as the system of mandatory price discounts was phased out during July 2024. Nevertheless, the Monetary Council did not change the key interest rate at its July policy meeting, so the base rate remains at 6.5%. The Council's communication remained hawkish, stating that it is not yet time for further interest rate cuts. Only a technical adjustment was made: the required reserve ratio was reduced from 10% to 8%, but this does not affect the overall direction of monetary policy. During the month Hungarian long end government bond yields increased by circa 20 bps, but still moving in a relatively tight range. Us macro data started to deteriorate, which maybe be a hint on global growth slowdown, as a result we still hold duration overweight.
