

VIG Opportunity Developed Markets Equity Investment Fund

A series HUF MONTHLY report - 2025 JULY (made on: 07/31/2025)

INVESTMENT POLICY OF THE FUND

The Fund aims to profit from the returns on global equity market investments through stock prices and dividend income. According to the intentions of the Fund Manager, the bulk of the Fund's portfolio is made up of shares of foreign companies issued through public offerings, but the Fund may also invest in shares issued by Hungarian companies. The proportion of shares that can be held in the Fund at any given time may reach the prevailing legal maximum. The Fund Manager has the option, at its own discretion, of hedging all or part of its foreign exchange risks using forward currency positions subject to observing the applicable legal requirements.

MARKET SUMMARY

Several factors supported the rise of the US stock market in July: the weakening of the dollar, algorithmic position building due to declining realized volatility, and the continued strong growth narrative in the technology sector, particularly among AI and semiconductor companies. The economic slowdown – for example, weak consumer spending and labor market data, as well as low private sector growth estimates by ADP Research, the global leader in employment performance measurement – did not cause panic.

The passage of the budget bill known as the "Big Beautiful Bill" provided a significant fiscal stimulus, which supported the stock market in the short term but raised concerns among bond market investors about the already controversial sustainability of public debt in the longer term. The yield on the 10-year US government bonds rose, along with the rest of the yield curve, reflecting uncertainty about the solvency of the government.

European markets showed similarly mixed performance. Favorable developments in trade negotiations supported stock indices, but bond markets saw a significant sell-off, mainly due to expectations of a slowdown in interest rate cuts by the European Central Bank. Inflation rose slightly but remains around the 2% target. The ECB's communication remained cautious, but Vice-President De Guindos warned of the dangers of the EUR/USD rate reaching 1.20, which somewhat halted the euro's appreciation.

The Fund achieved a positive return in July and outperformed its benchmark index. In July, we continued to maintain our overweight position in the US markets relative to Europe. We are still holding our position in UnitedHealth. In addition, we purchased shares in the pharmaceutical company Novo Nordisk at the end of the month. We opened a small position with the intention of buying more if the share price falls further. At the end of the month, the Fund was on par with the benchmark index.
