

# VIG Polish Bond Investment Fund

I series PLN MONTHLY report - 2025 JULY (made on: 07/31/2025)

## INVESTMENT POLICY OF THE FUND

The objective of the investment fund is to make the Polish bond market accessible to the investors, and to function as a relatively stable, medium-risk investment form bringing steady real yields to our Clients on middle term already, without having to tie down their money for a fixed period of time. The Fund mainly invests in Polish government securities issued in zloty, however, the portfolio manager has some room to complement the portfolio with other bond-type investments. Our goal is to achieve the highest yield while taking the lowest risk. To make investment decisions we use the tools of both fundamental and technical analysis, and we take into consideration the investor sentiment on the markets at all times. The portfolio manager seeks out potential investment opportunities based on the macro-economical expectations, the expected yield curve, the return expected on the curve and the market volatility, and selects investments that are considered to be safe and bring relatively high yields in exchange for the risks taken. The Fund strives for complete exchange risk coverage of foreign currency exposure for the target currency.

## MARKET SUMMARY

Polish bonds performed well in July. The short end of the yield curve strengthened in particular, with 3-year yields falling by 12 basis points, while the long end mostly remained unchanged by the end of the month. At the early July rate-setting meeting, the central bank surprised the market by cutting the key interest rate by 25 basis points, bringing it to the current level of 5%. The decision was unexpected due to the previously hawkish tone, but central bank governor Glapiński emphasized that the 25 basis point cut was justified by slowing wage growth, weaker economic data, and lower inflation. Moving on with economic data, according to preliminary figures, inflation in July came in above market expectations of 2.8%, with prices rising by 3.1% year-on-year. The figure was largely supported by falling fuel prices and the high base effect from the previous year. The Purchasing Managers' Index (PMI) rose to 45.9 in July from 44.8 in the previous month. However, the indicator remains below the critical threshold of 50, mainly due to declining new orders and a slowdown in production. Industrial production fell by 0.1% in the sixth month of the year. As for public finances, the government recorded a deficit of PLN 11,402.7 million in the sixth month of the year, bringing the 12-month rolling budget deficit to 7% of GDP.

## GENERAL INFORMATION

Fund Manager:	VIG Investment Fund Management Hungary
Custodian:	Unicredit Bank Hungary Zrt.
Main distributor:	VIG Investment Fund Management Hungary
Benchmark composition:	100% TBSP Index
ISIN code:	HU0000710942
Start:	08/07/2012
Currency:	PLN
Net Asset Value of the whole Fund:	17,304,538,391 HUF
Net Asset Value of I series:	128,051,166 PLN
Net Asset Value per unit:	1.343809 PLN
