

## INVESTMENT POLICY OF THE FUND

The Fund's goal is to achieve capital growth through active portfolio management by investing in green bonds issued by governments and corporations in developed and emerging markets, while also advancing the Fund's sustainability objectives. The Fund Manager integrates sustainability risks and their management into the Fund's investment decision-making process. The Fund aims to promote environmental and/or social characteristics and pursues sustainable investment, thereby falling under Article 9 of the SFDR regulation. The Fund's credit rating restriction is that it may only purchase bonds with an investment-grade rating. With a reasonable risk approach, the Fund seeks the highest possible capital growth, primarily through asset allocation in green bonds available in global bond markets. The Fund's investment strategy is built on sustainable value creation, aiming to develop an actively managed, well-diversified portfolio that considers both sustainability criteria and the fundamentals of its assets. To achieve this, it primarily invests in developed market green corporate and government bonds issued in foreign currencies, and may also hold emerging market green corporate and government bonds. The bond portfolio may also include short- and long-term, fixed or variable rate bonds issued by mortgage banks, other financial institutions, municipalities, or other economic organizations. The Fund's goal is sustainable investment, which it plans to achieve primarily, though not exclusively, through a positive environmental impact within the ESG universe. In pursuit of this, it mainly intends to invest in bonds from countries with low greenhouse gas emission intensity, a strong exercise of civil liberties, and low rates of social violations. Additionally, the Fund plans to invest in bonds of companies with a low ecological footprint, contributing through their activities to solving global environmental issues, such as the transition to a low-carbon economy or a circular economic model. The Fund may hold assets with exposures differing from the base currency up to 100%. The Fund Manager generally hedges currency exposures to the target currency (EUR) at 100%, but may also hold open currency positions depending on market expectations. The Fund invests at least 80% in assets issued and traded outside Hungary.

## MARKET SUMMARY

In August, movements in the US capital market were primarily determined by macroeconomic and political news. The increase in the Personal Consumption Expenditures index indicates higher inflation. The ISM purchasing managers' index indicates a slowdown in economic activity and a weakening labor market. The question is whether the Federal Reserve will prioritize curbing inflation or risk higher unemployment.

Currently, the market is pricing in two interest rate cuts this year, which aligns with the US administration's rhetoric. However, the dismissal of the head of the US Bureau of Labor Statistics and the departure of Fed Governor Lisa Cook may increase the likelihood of interest rate cuts and call into question the integrity of the US institutional system. Interest rate cut expectations continue to be the main support for the stock market, while the performance of the "Magnificent Seven" group of tech giants is diverging from the market as a whole once again.

Growth dynamics in Europe remain uncertain. While the AI sector is driving market performance in the U.S., Europe lacks a similar growth engine. The automotive industry is burdened by a deteriorating export environment due to tariffs and growing global competition in the electric car segment. This is partly offset by military and infrastructure investments. Although the outperformance of European equities has moderated since the beginning of the year, valuations remain favorable.

Eurozone inflation in August edged closer to the European Central Bank's 2% target, thanks to base effects, while eurozone yields also showed a moderate increase. No significant changes were made to the portfolio in August; we continue to overweight interest rate risk relative to the benchmark index, anticipating that the European growth outlook will remain gloomy, with recently announced tariffs offering no relief.

## GENERAL INFORMATION

Fund Manager:	VIG Investment Fund Management Hungary
Custodian:	Erste Bank Hungary Zrt.
Main distributor:	VIG Investment Fund Management Hungary
Benchmark composition:	Fund has no benchmark
