

VIG MegaTrend Equity Investment Fund

U series USD MONTHLY report - 2025 AUGUST (made on: 08/31/2025)

INVESTMENT POLICY OF THE FUND

The fund aims to profit from global megatrends that extend beyond economic cycles. Such trends may include demographic changes (ageing society, developing markets), efficiency gains due to scarce resources (renewable resources, energy efficiency), urbanisation, or even technological innovation. The fund aims to achieve its objectives through equity-type instruments, primarily exchange-traded funds (ETFs), equities and open-ended public investment funds. Megatrends are long-term changes that have a lasting impact on our social and economic environment. The fund aims to share in the profit growth of companies that could be winners in these processes. Megatrends are long-term processes that extend beyond normal economic cycles, are usually global and affect the whole world. Consequently, the fund does not have a geographical specification. As the fund aims to profit from long-term growth and has significant exposure to stock markets, it is recommended for risk-taking investors with a long-term investment horizon. The Fund holds its assets in euro. The Fund invests only in investments where the expense ratio remains below 2.5%, but always aims to keep the average fees charged on the underlying collective investment instruments below 1%. The fund also does not have a geographical specification, and thus no typical currency composition. The target currency of the Fund is therefore the settlement currency of the benchmark index (USD). Due to the strategy of the Fund, it may also invest in assets denominated in foreign currency. The Fund may hedge some or all of its foreign currency risk using forward currency positions against the target currency, i.e. the settlement currency of the benchmark (USD). The Fund Manager has a discretionary right to reduce the foreign currency risk of positions denominated in a currency other than the target currency, depending on market developments, by entering into hedge transactions. In addition, the use of equity and index futures is permitted in order to effectively build the Fund's portfolio.

MARKET SUMMARY

In August, movements in the US capital market were primarily determined by macroeconomic and political news. The increase in the Personal Consumption Expenditures index indicates higher inflation. The ISM purchasing managers' index indicates a slowdown in economic activity and a weakening labor market. The question is whether the Federal Reserve will prioritize curbing inflation or risk higher unemployment. Currently, the market is pricing in two interest rate cuts this year, which aligns with the US administration's rhetoric. However, the dismissal of the head of the US Bureau of Labor Statistics and the departure of Fed Governor Lisa Cook may increase the likelihood of interest rate cuts and call into question the integrity of the US institutional system. Interest rate cut expectations continue to be the main support for the stock market, while the performance of the "Magnificent Seven" group of tech giants is diverging from the market as a whole once again. Growth dynamics in Europe remain uncertain. While the AI sector is driving market performance in the U.S., Europe lacks a similar growth engine. The automotive industry is burdened by a deteriorating export environment due to tariffs and growing global competition in the electric car segment. This is partly offset by military and infrastructure investments. Although the outperformance of European equities has moderated since the beginning of the year, valuations remain favorable.

GENERAL INFORMATION

Fund Manager:	VIG Investment Fund Management Hungary
Custodian:	Unicredit Bank Hungary Zrt.
Main distributor:	VIG Investment Fund Management Hungary
Benchmark composition:	100% MSCI AC World Daily Total Return Net USD Index
ISIN code:	HU0000724653
Start:	05/19/2020
Currency:	USD
Net Asset Value of the whole Fund:	75,834,536 EUR
