

VIG Opportunity Developed Markets Equity Investment Fund

I series HUF MONTHLY report - 2025 AUGUST (made on: 08/31/2025)

INVESTMENT POLICY OF THE FUND

The Fund aims to profit from the returns on global equity market investments through stock prices and dividend income. According to the intentions of the Fund Manager, the bulk of the Fund's portfolio is made up of shares of foreign companies issued through public offerings, but the Fund may also invest in shares issued by Hungarian companies. The proportion of shares that can be held in the Fund at any given time may reach the prevailing legal maximum. The Fund Manager has the option, at its own discretion, of hedging all or part of its foreign exchange risks using forward currency positions subject to observing the applicable legal requirements.

MARKET SUMMARY

In August, movements in the US capital market were primarily determined by macroeconomic and political news. The increase in the Personal Consumption Expenditures index indicates higher inflation. The ISM purchasing managers' index indicates a slowdown in economic activity and a weakening labor market. The question is whether the Federal Reserve will prioritize curbing inflation or risk higher unemployment. Currently, the market is pricing in two interest rate cuts this year, which aligns with the US administration's rhetoric. However, the dismissal of the head of the US Bureau of Labor Statistics and the departure of Fed Governor Lisa Cook may increase the likelihood of interest rate cuts and call into question the integrity of the US institutional system. Interest rate cut expectations continue to be the main support for the stock market, while the performance of the "Magnificent Seven" group of tech giants is diverging from the market as a whole once again. Growth dynamics in Europe remain uncertain. While the AI sector is driving market performance in the U.S., Europe lacks a similar growth engine. The automotive industry is burdened by a deteriorating export environment due to tariffs and growing global competition in the electric car segment. This is partly offset by military and infrastructure investments. Although the outperformance of European equities has moderated since the beginning of the year, valuations remain favorable.
