

VIG Czech Short Term Bond Investment Fund

A series CZK MONTHLY report - 2025 SEPTEMBER (made on: 09/30/2025)

INVESTMENT POLICY OF THE FUND

The Fund aims to increase the value of its assets under management and to provide investors with a higher yield than Czech bank deposits and short-term bonds over a period of 1 to 2 years. No individual investor's decisions can be made in the Fund. The Fund Manager selects portfolio elements in accordance with the above principles. When making investment decisions, the tools of fundamental analysis and technical analysis are used, and the current market sentiment is also taken into account. The Fund primarily invests in discount treasury bills issued by the Czech State, sovereign bonds, bonds of quasi-sovereign companies, or bonds or deposit-like instruments issued by the Czech National Bank, the European Central Bank or the central bank of another Member State of the European Union. To a limited extent, the portfolio may include government securities, state-guaranteed bonds, corporate bonds (including those issued by financial institutions) and mortgage bonds with at least investment-grade credit rating. Investments may be made in Czech crowns or, to a limited extent, in other currencies. In the case of assets denominated in a currency other than Czech crowns, the Asset Manager shall strive to fully hedge foreign exchange risks (there cannot be a difference of more than 5% between the currency exposure of the derivative transaction and that of the asset to be hedged).

The Fund may enter into deposit and repo transactions, invest - to a limited extent - in units in collective investment undertakings, and derivatives may as well be used (for the purposes of hedging or building an efficient portfolio).

MARKET SUMMARY

In the Czech Republic, the latest September inflation came in below market expectations, with the Czech Statistical Office reporting a 2.3% year-on-year price increase. At its September rate-setting meeting, the Monetary Council kept the policy rate unchanged, which therefore still stands at 3.5%. Communication remained strict, as inflation risks in the economy were still deemed elevated. The main concern lies in the composition of inflation, with both services and food prices showing high annual growth. Stronger wage growth continues to pose an upside risk to the inflation outlook. In September, markets were already pricing in the outcome of the early October parliamentary elections. According to opinion polls, the ANO party led by Andrej Babiš took the lead, which pushed Czech yields higher due to expectations of fiscal expansion. At the 1-year maturity, yields increased by 8 basis points, while at the 3-year maturity bond yields rose by 10 basis points.

GENERAL INFORMATION

Fund Manager:	VIG Investment Fund Management Hungary
Custodian:	Erste Bank Hungary Zrt.
Main distributor:	VIG Investment Fund Management Hungary
Benchmark composition:	Fund has no benchmark
