

## INVESTMENT POLICY OF THE FUND

The Fund's goal is to achieve capital growth through active portfolio management by investing in green bonds issued by governments and corporations in developed and emerging markets, while also advancing the Fund's sustainability objectives. The Fund Manager integrates sustainability risks and their management into the Fund's investment decision-making process. The Fund aims to promote environmental and/or social characteristics and pursues sustainable investment, thereby falling under Article 9 of the SFDR regulation. The Fund's credit rating restriction is that it may only purchase bonds with an investment-grade rating. With a reasonable risk approach, the Fund seeks the highest possible capital growth, primarily through asset allocation in green bonds available in global bond markets. The Fund's investment strategy is built on sustainable value creation, aiming to develop an actively managed, well-diversified portfolio that considers both sustainability criteria and the fundamentals of its assets. To achieve this, it primarily invests in developed market green corporate and government bonds issued in foreign currencies, and may also hold emerging market green corporate and government bonds. The bond portfolio may also include short- and long-term, fixed or variable rate bonds issued by mortgage banks, other financial institutions, municipalities, or other economic organizations. The Fund's goal is sustainable investment, which it plans to achieve primarily, though not exclusively, through a positive environmental impact within the ESG universe. In pursuit of this, it mainly intends to invest in bonds from countries with low greenhouse gas emission intensity, a strong exercise of civil liberties, and low rates of social violations. Additionally, the Fund plans to invest in bonds of companies with a low ecological footprint, contributing through their activities to solving global environmental issues, such as the transition to a low-carbon economy or a circular economic model. The Fund may hold assets with exposures differing from the base currency up to 100%. The Fund Manager generally hedges currency exposures to the target currency (EUR) at 100%, but may also hold open currency positions depending on market expectations. The Fund invests at least 80% in assets issued and traded outside Hungary.

## MARKET SUMMARY

In September, the prospect of a soft landing for the U.S. economy emerged once again. Poor labor market and retail data confirmed market expectations of interest rate cuts. Meanwhile, disinflation data allowed the Fed to restart the cycle of interest rate cuts without causing panic. The inflationary impact of Trump's tariffs has yet to materialize, allowing the Fed to "overlook" this risk. Slowing growth, easing inflationary pressures, and looser monetary policy created a favorable environment for a stock market rally and a rotation into previously lagging sectors as the year ended. However, the mood was not so rosy in European markets. Weak macroeconomic indicators discouraged risk-taking. Political uncertainty further exacerbated the situation, with the threat of a government crisis in France, for example, increasing volatility. Some positive news came from the reduction in U.S. car tariffs, which improved the outlook for German exports. Inflation stabilized at around 2%, prompting the ECB to leave its key interest rates unchanged. The market does not anticipate further easing. This strengthened the euro in early September, which is bad news for European companies that produce for export markets. The key question for October is whether inflation will continue to moderate. This could stabilize bond markets and provide support for equities, although weak growth could hinder progress. Eurozone yields showed no major movement throughout September. The market currently does not expect further rate cuts from the European Central Bank; despite weak growth, the ECB believes the pace of inflation may remain above the 2% target next year as well. Within the Fund, we increased our exposure to Romanian green government bonds and used available liquidity to purchase Chilean green government bonds.

## GENERAL INFORMATION

Fund Manager:	VIG Investment Fund Management Hungary
Custodian:	Erste Bank Hungary Zrt.
Main distributor:	VIG Investment Fund Management Hungary
Benchmark composition:	Fund has no benchmark
ISIN code:	HU0000732144
Start:	07/03/2025
Currency:	CZK
