

INVESTMENT POLICY OF THE FUND

MARKET SUMMARY

In October, Hungarian inflation likely rose by 4.3% year-on-year, according to market expectations. At its October rate setting meeting, the Monetary Council left the key interest rate unchanged, keeping the base rate at 6.5%. The central bank's communication remains hawkish, and we expect the Monetary Council to keep the key rate unchanged until the parliamentary elections in April next year. Given that several preferential loan programs are currently available in the economy, a rate cut during this period would likely have only a limited effect. The third-quarter GDP data was again weaker; while year-on-year growth reached 0.6%, the Hungarian economy stagnated on a quarterly basis. Belly and long end of the Hungarian yield curve managed to crawl lower a bit during the month, however hit the wall here: without rate cuts, the short end and belly of the curve started to be expensive, risk premium is not extreme for long end either, as a result attractiveness of the Hungarian yield curve decreased. Based on this we realised profit, in our opinion risk/reward is no longer compelling.
