

INVESTMENT POLICY OF THE FUND

MARKET SUMMARY

In October, US capital markets continued to ride the AI wave, while the Fed's expected final interest rate cut this year and the end of quantitative tightening pumped further liquidity into the system. In addition to the dominance of the technology sector, the minor trade truce reached at the Trump-Xi meeting—a reduction in tariffs from 57% to 47% and a one-year easing of rare earth exports—came as a positive surprise, strengthening the dollar and growth prospects. At the same time, the threat of a government shutdown, record data center investments, and Fed Chairman Jerome Powell's caution regarding the December cut dampened the performance of traditional sectors. Bond yields moderated only slightly at longer maturities, while the short end saw a noticeable repricing of the interest rate curve. Europe remained in the grip of political and economic uncertainty: the initial optimism surrounding the formation of the French government proved short-lived, with banking sector stocks falling particularly sharply. Inflation rose slightly in September, but the ECB's decision to keep its key interest rate unchanged raised hopes of easing. Positive signs include a surge in car sales (especially hybrids imported from China) and stable unemployment. On the other hand, weak German industrial production and high energy prices linked to sanctions against Russia continue to put pressure on the continent's economy.

The upward trend continued on global stock markets in October, with Central European markets, especially Hungary, significantly outperforming the international markets. Investor sentiment was shaped by the US Federal Reserve's interest rate decision meeting, flash reports from major technology companies, and expectations regarding China. Asian stock markets saw minor corrections, while Europe experienced moderate but overall positive movements. The MSCI World Index, which tracks the performance of large- and mid-cap companies in developed markets, rose 2% in dollar terms, while the BUX Index, which tracks the performance of the largest and most liquid Hungarian companies listed on the Budapest Stock Exchange, rose 8.5% in forint terms and 6.9% in dollar terms, making it one of the best performing markets in the region. The winner of the month was the Hungarian IT and telecommunications company 4iG, with a price increase of more than 50%, followed by the double-digit gains of the freight moving and logistics company Waberer's and OTP. Among the weaker performers, ANY Biztonsági Nyomda, Autowallis and Gránit Bank showed minor declines. Overall, October was a particularly strong month for the domestic stock market, accompanied by a further strengthening of investor confidence.

GENERAL INFORMATION

Fund Manager:	VIG Investment Fund Management Hungary
Custodian:	Unicredit Bank Hungary Zrt.
Main distributor:	VIG Investment Fund Management Hungary
Benchmark composition:	100% BUX Index
ISIN code:	HU0000735022
Start:	05/03/2024
Currency:	USD
Net Asset Value of the whole Fund:	4,701,430,855 HUF
Net Asset Value of UI series:	1,406,107 USD
Net Asset Value per unit:	1.692207 USD
