

## INVESTMENT POLICY OF THE FUND

The purpose of the investment fund is to create an equity fund that seeks to benefit from innovation in various industries. The Fund aims to achieve long-term capital growth by investing in global companies that are at the forefront of the use of disruptive technologies and can thus play a leading role in their industries. Disruptive technology refers to innovations or developments that significantly change or disrupt existing industries, business models, products or services. Such trends include, for example, big data (artificial intelligence, cyber security, quantum computers), e-mobility (electric cars and related battery technologies), digitisation and related entertainment (metaverse, e-sports) and, last but not least, fintech and robotics industry breakthroughs.

The Fund aims to achieve its objectives through equity-type instruments, primarily exchange-traded funds (ETFs), equities and open-ended public investment funds. The Fund takes a forward-looking approach and actively seeks companies in industries that show potential for growth through technological innovation. Investments are made in companies that have strong fundamentals and are capable of long-term value creation and achieving competitive advantage through innovation. The investment philosophy is based on the belief that innovation is a key driver of long-term business success and shareholder value. Trends related to technological innovation are long-term processes that extend beyond normal economic cycles and are generally global and affect the entire world. Consequently, the Fund is not subject to any geographical restrictions. Since the Fund aims to profit from long-term growth and has significant exposure to the equity market, we recommend the Fund to investors who want to invest in the longer term and have a relatively high willingness to take risk.

## MARKET SUMMARY

The Fund's price continued to rise in October as US capital markets continued to ride the AI wave, while the Fed's expected final interest rate cut this year and the end of quantitative tightening pumped further liquidity into the system. In addition to the dominance of the technology sector, the minor trade truce reached at the Trump-Xi meeting – reducing tariffs from 57% to 47% and easing rare earth exports for one year – came as a positive surprise, strengthening the dollar and growth prospects. At the same time, the threat of a government shutdown, record data center investments, and Fed Chairman Jerome Powell's caution regarding the December cut dampened the performance of traditional sectors. The US reporting season is in full swing, with 64% of S&P 500 Index components having reported their third-quarter results by the end of October, 83% of which reported higher-than-expected earnings. The largest technology companies, which are the Fund's most significant investments, have also reported. Based on the results of hyperscalers, data center investments will continue to accelerate through 2026, fueled by huge structural demand. And there are no signs of a slowdown yet. Major US technology companies—such as Meta Platforms, formerly Facebook, Microsoft, Amazon.com, Inc., and Google's successor Alphabet Inc. – plan to invest a total of more than USD 400 billion in AI infrastructure (data centers, chips, cloud services) this year, and even then they say it will not be enough. The stock price reactions following the giant companies' results show that investors will only accept increased capital expenditure if it is supported by strong earnings growth and credible prospects for the future monetization of AI investments. The AI investment wave is not just a side story – it is the engine of the current bull market. However, valuation levels are already high in historical terms, and market expectations leave little room for error. Momentum remains strong, so AI companies continue to make up the largest part of the portfolio.

## GENERAL INFORMATION

Fund Manager:	VIG Investment Fund Management Hungary
Custodian:	Erste Bank Hungary Zrt.
Main distributor:	VIG Investment Fund Management Hungary
Benchmark composition:	Fund has no benchmark
ISIN code:	HU0000732995
