

VIG Polish Bond Investment Fund

A series HUF MONTHLY report - 2025 OCTOBER (made on: 10/31/2025)

INVESTMENT POLICY OF THE FUND

The objective of the investment fund is to make the Polish bond market accessible to the investors, and to function as a relatively stable, medium-risk investment form bringing steady real yields to our Clients on middle term already, without having to tie down their money for a fixed period of time. The Fund mainly invests in Polish government securities issued in zloty, however, the portfolio manager has some room to complement the portfolio with other bond-type investments. Our goal is to achieve the highest yield while taking the lowest risk. To make investment decisions we use the tools of both fundamental and technical analysis, and we take into consideration the investor sentiment on the markets at all times. The portfolio manager seeks out potential investment opportunities based on the macro-economical expectations, the expected yield curve, the return expected on the curve and the market volatility, and selects investments that are considered to be safe and bring relatively high yields in exchange for the risks taken. The Fund strives for complete exchange risk coverage of foreign currency exposure for the target currency.

MARKET SUMMARY

Polish government bonds performed well again in October. Yields fell by 18 basis points on 3-year maturities, by 12 basis points on 5-year maturities, and by 13 basis points on 10-year maturities. At its early October policy meeting, the central bank cut interest rates once more, lowering the key rate by 25 basis points to 4.5%. However, the Monetary Policy Council remains cautious about further rate cuts, as both headline and core inflation are still above the central bank's target. Although the freeze on energy prices has been extended until the end of the year, its removal could again push inflation higher. Turning to economic data, preliminary figures indicate that annual inflation declined in October, with the Polish Statistical Office reporting a 2.8% year-on-year rate. Fuel prices fell during the month, while food prices increased. Industrial production rose by 7.4% year-on-year in September, the ninth month of the year. Retail sales also strengthened, with annual growth accelerating from 3.1% in August to 6.4% in September. As for public finances, the state recorded a deficit of PLN 29,415.9 million in September, bringing the 12-month rolling budget deficit to 8.07% of GDP.
