

INVESTMENT POLICY OF THE FUND

The Fund's objective is to establish a portfolio for its Investors that generates positive returns - higher than the yields available on the domestic money market - under all circumstances, i.e. the Fund pursues a "total return" strategy. The Fund seeks to achieve this goal by selecting, through various analytical techniques, the asset classes and investment funds that have the greatest price growth potential and make investments through the purchase of investment units and collective investment securities. The Fund invests primarily in investment funds managed by VIG Befektetési Alapkezelő Magyarország Zrt., but may also purchase other investment funds and collective investment securities in its portfolio for diversification purposes or if the given asset class is not yet covered by the Fund Manager's funds. In order to ensure liquidity, the Fund may hold in its portfolio discount treasury bills and government bonds issued by the Government Debt Management Agency (ÁKK), interest-bearing securities guaranteed by the Hungarian State, and bonds issued by the MNB. As the range of possible investments includes investments denominated in foreign currency, ETFs and investment units, the Fund's investors may also bear some foreign exchange risk. According to the Fund's investment policy, it invests or may invest more than 80 percent of its assets in investment units or other securities issued by a collective investment undertaking. However, the Fund does not intend to hold more than 20% weight in any one investment fund, except for the VIG Hungarian Money Market Fund, VIG Hungarian Bond Fund, VIGMoneyMaxx Emerging Market Total Return Fund, VIG Alfa Absolute Investment Fund, VIG Bondmaxx Total Return Bond Fund, VIG Maraton ESG Multi Asset Fund, VIG Panoráma Total Return Fund and VIG Ózon Annual Capital Protected Fund, the weight of which may be as much as 100% within the Fund's portfolio.

MARKET SUMMARY

The Fund's value rose by 0.6% in September. During September, the scenario of a soft landing for the US economy came to the fore once again. Worse-than-expected labor market and retail data confirmed market expectations of interest rate cuts, while disinflation data gave the Fed the green light to restart the interest rate cut cycle without causing any particular panic. The inflationary impact of Trump's tariffs has not yet materialized, so the Fed was able to "look through" this risk. Slowing growth, easing inflationary pressures, and looser monetary policy combined to create a favorable environment for the stock market rally to spread and paved the way for a rotation into previously lagging sectors as the end of the year approached. The mood was not so rosy in European markets. Weak macroeconomic indicators did not encourage risk-taking. The situation was further exacerbated by political uncertainty, with the threat of a government crisis in France, for example, increasing volatility. Meanwhile, the regular incursions of Russian drones into NATO airspace increased the risk of escalation in the Russian-Ukrainian war. Some positive news came from the reduction in US car tariffs, which improved the outlook for German exports. Inflation stabilized at around 2%, so the ECB left its key interest rates unchanged, and the market does not expect further easing for the time being. The performance of our absolute return funds was thus improved most significantly by our equity investments and short bond exposures. The systematic, volatility-controlled ETF portfolio segment launched in July also contributed positively to the Fund's performance.
