

VIG SocialTrend ESG Equity Investment Fund

EI series EUR MONTHLY report - 2025 OCTOBER (made on: 10/31/2025)

INVESTMENT POLICY OF THE FUND

The purpose of the investment fund is to create an equity fund that can profit from long-term demographic changes and the related changes in consumer habits. The Fund aims to achieve long-term capital growth by investing in global companies that can benefit from the growth and aging of the population, the social and economic changes associated with a healthy lifestyle, urbanisation, the expansion of the emerging markets' middle class and the global economic trends stemming from these social changes, as well as the changing consumption habits driven by such demographic changes.

The Fund aims to achieve its objectives through equity-type instruments, primarily exchange-traded funds (ETFs), equities and open-ended public investment funds. The Fund takes a forward-looking approach and actively seeks companies in industries that can benefit from the long-term global demographic changes and related changes in consumer habits. Investments are made in companies that have strong fundamentals and are well positioned for long-term value creation and competitive advantage due to demographic and social changes. Trends related to demographic and social changes are long-term processes that go beyond normal economic cycles and are generally global and affect the entire world. Consequently, the Fund is not subject to any geographical restrictions. Since the Fund aims to profit from long-term growth and has significant exposure to the equity market, we recommend the Fund to investors who want to invest in the longer term and have a relatively high willingness to take risk.

MARKET SUMMARY

US capital markets continued to ride the AI wave, while the Fed's expected final interest rate cut this year and the end of quantitative tightening pumped further liquidity into the system. In contrast, more defensive sectors were again unable to rise to the same extent. At the beginning of the month, the healthcare sector was particularly strong following news of US price discount agreements with major pharmaceutical companies, thus avoiding worse scenarios. The US government is launching an investigation into the massive discrepancy between foreign and domestic drug prices, with the aim of equalizing them and forcing the companies concerned to reduce their US prices, if necessary with the help of tariffs (if a company does not reduce its prices, it will be subject to higher tariffs on its products manufactured abroad). We have further increased the Fund's exposure to the healthcare sector due to favorable developments and low prices. We believe that healthcare stocks can also be a good diversification option for investors in today's heavily weighted US stock market, where the seven stocks with the largest market capitalization (the "Magnificent 7": Nvidia, Microsoft, Apple, Amazon, Alphabet (Google), Meta Platforms, and Tesla) already account for nearly 35% of the index.
