

INVESTMENT POLICY OF THE FUND

The aim of the Fund is to invest on the stock market of the Central and Eastern European Region. It is for investors who would like a share in the long-term performance of listed companies in the region. In the development of the portfolio of this Fund, the priority is to optimise the aggregate risk of the securities added to the Fund. In order to reduce risks, the Fund Manager exercises the highest degree of diligence when selecting the securities to be included in the portfolio. It analyses the risk factors of the securities, and supports its decisions with in-depth calculations.

The Fund purchases stocks issued by companies in Central and Eastern European region (primarily Hungary, the Czech Republic, Poland, Austria, Romania, secondarily Slovenia, Croatia, Slovakia), but it may also invest in the stocks of other developing and developed foreign companies as well as other collective investment securities. Due to the strategy of the Fund, it may also invest in assets denominated in foreign currency. The Fund may hedge some or all of its foreign currency risk using forward currency positions against the target currency. The Fund Manager has the discretionary right to reduce the foreign currency risk of the currency positions differing from the Fund's target currency, based on the market processes by concluding hedge transactions. In addition, the use of equity and index futures is permitted in order to effectively build the Fund's portfolio. To ensure liquidity, the Fund wishes to add government securities issued by member states of the EU, OECD, or G20 to its portfolio.

MARKET SUMMARY

Central European equity markets ended November with a modest increase in euro terms. Over the month, the Fund outperformed its benchmark index. The Czech and Hungarian markets delivered outstanding performance, driven primarily by the rebound of major banks such as Erste, Moneta and OTP. Poland performed somewhat weaker this time; there, mainly commodity-linked companies (KGHM) outperformed. In contrast, consumer-related stocks underperformed, with both retail and apparel companies experiencing a correction during the month. There were also several significant corporate transactions in November: in Poland, major shareholders of Żabka and Murapol sold shares, while in Hungary, Shopper Park Plus raised a substantial amount of new capital. Over the month, we slightly increased the Fund's equity exposure, mainly on the Polish and Hungarian markets.
