

VIG Global Emerging Market Bond Investment Fund

I series HUF MONTHLY report - 2025 NOVEMBER (made on: 11/30/2025)

INVESTMENT POLICY OF THE FUND

The Fund aims to achieve capital growth by investing in bonds of emerging European countries and state-owned companies. The Fund does not apply credit rating restrictions: it may purchase securities of any country or company with any long-term credit rating. The Fund aims for the highest possible capital growth alongside reasonable risk-taking. The Fund primarily purchases foreign currency emerging market bonds, in addition to which it holds Hungarian local currency short-term and long-term bonds for diversification and liquidity management purposes. The bond portfolio may also include short-term, long-term, fixed or floating-rate, structured and convertible bonds issued by mortgage credit institutions, other credit institutions, local governments or other business entities. The core of the Fund's investments is Central Eastern Europe (Hungary, Croatia, Poland, Romania, Slovakia, Ukraine), South East Europe (Serbia, Turkey), the Baltics (Latvia, Lithuania) and the Commonwealth of Independent States (Azerbaijan, Belarus, Kazakhstan, Russia, Georgia, Armenia) and bonds of majority state-owned companies, in addition to which the Fund holds short-term and long-term Hungarian government securities for diversification and liquidity management purposes. The target weight for bond exposures in the Fund in the 16 countries listed (target countries) is 95%. We do not set a limit on debt classification in the Fund. The Fund may only conclude derivative transactions for hedging purposes, or in the interest of establishing an efficient portfolio. The Fund may also hold non-leveraged bond-type collective investment forms. The Fund may also take on significant foreign currency exposure, which is normally covered 100% by the Fund Manager in the target currency (USD), but depending on market conditions, the Fund may also hold open foreign currency positions.

MARKET SUMMARY

Tariff uncertainty remains elevated, even as the U.S. has secured several trade agreements across Asia. Within the U.S. economy, certain inflation pressures persist, though easing rental inflation should help offset some of the upward momentum in the months ahead. While Chair Powell surprised markets by noting that a December rate cut is "not a foregone conclusion," investors still largely expect an easing move at that meeting, followed by an extended pause through 2026–27. Expectations also point to a 25-bps rate hike from the Bank of Japan in December. At the Bank of England, the baseline forecast now anticipates rate cuts beginning in February rather than April. In emerging markets, a combination of resilient global activity, Fed easing, and a softer—if not range-bound—U.S. dollar should keep conditions broadly supportive. EM equities continue to be the preferred asset class, helped by light investor positioning and appealing valuations.

Global growth remains steady as monetary policy paths diverge, and inflation pressure proves persistent. GDP growth for the year has slightly exceeded expectations, buoyed by strong export performance even as domestic demand stayed subdued in several Asian economies. Ongoing macro uncertainty and lingering inflation risks continue to restrain consumption and keep savings elevated. However, some EM economies—such as Poland, India, Chile, and Colombia—have benefited from cooling inflation and earlier rate-cut cycles.

Markets are now pricing in more pronounced policy divergence: the Fed and several EM central banks are expected to continue easing, while most G10 central banks are nearing the end of their cutting cycles. Over the past month, sovereign yields climbed across most markets—including gilts, Bunds, and JGBs—while U.S. Treasury yields declined on softer labour data and dovish Fed communication. UK gilt yields briefly surged in mid-November amid sticky inflation and renewed fiscal concerns before 10-year Treasury yields later retraced.

In November, we re-entered long positions in Senegal and Ukraine, supported by appealing valuations and, in Ukraine's case, the prospect of potential progress toward a peace agreement. We also took profits on our Zambia positions. Overall, we remain neutral on EM external debt, as valuations remain stretched and year-to-date returns have already been strong.

GENERAL INFORMATION

Fund Manager:	VIG Investment Fund Management Hungary
Custodian:	Unicredit Bank Hungary Zrt.
Main distributor:	VIG Investment Fund Management Hungary
Benchmark composition:	Fund has no benchmark
ISIN code:	HU0000718408
Start:	12/30/2016
Currency:	HUF
