

# VIG Hungarian Money Market Investment Fund

A series HUF MONTHLY report - 2025 NOVEMBER (made on: 11/30/2025)

## INVESTMENT POLICY OF THE FUND

The Fund's aim is to function as a stable, low-risk form of investment, while providing investors with higher returns than they could expect from bank deposits. In order to ensure liquidity, the Fund intends primarily to hold in its portfolio government bonds and discount treasury bills issued by the Government Debt Management Agency (ÁKK) and bonds issued by the National Bank of Hungary (MNB). The weighted average maturity (WAM) of the assets in the portfolio may not exceed 6 months and the weighted average life (WAL) of the assets may not exceed 12 months. The Fund may hold in its portfolio low-risk debt securities issued by banks and companies, which are expected to provide higher returns than government securities and are denominated primarily in HUF, but also in other currencies. The Fund may also invest to a limited extent in government securities or guaranteed bonds issued by the OECD or a G20 country, or any debt security issued or guaranteed by the central government or a regional or local government or the central bank of any EU Member State, or by the European Union, the European Central Bank or the European Investment Bank. The weighted average maturity (WAM) of the assets in the portfolio may not exceed 6 months and the weighted average life (WAL) of the assets may not exceed 12 months. In addition, the remaining time to maturity of each security is a maximum of 2 years and a maximum of 397 days until the nearest interest-rate determination date. The Fund may also keep its liquid assets in bank deposits. The fund may hold a limited amount of foreign currency assets in its portfolio, but only subject to the full hedging of currency risk.

VIG Moneymarket Fund is not a guaranteed investment. The risk of loss of the principal is to be borne by the investor. An investment in VIG Moneymarket Fund is different from an investment in deposits, with particular reference to the risk that the principal invested in VIG Moneymarket Fund is capable of fluctuation. VIG Moneymarket Fund does not rely on external support for guaranteeing the liquidity of the fund or stabilising the NAV per unit or share.

## MARKET SUMMARY

In November, Hungarian inflation may have decreased slightly in line with market expectations, with prices rising by 4% year-on-year. At its November rate-setting meeting, the Monetary Council again left the policy rate unchanged, so the base rate remains at 6.5%. The central bank's communication remained hawkish, and we expect that the Monetary Council will not change the base rate until after the elections next April. The third-quarter GDP data was again weak: although year-on-year growth reached 0.6%, the Hungarian economy stagnated once more in quarter-on-quarter terms. Analysts' forecasts for this year have been steadily declining, and the market consensus currently expects GDP growth between 0.2% and 0.5% in 2025. During the month, short-term yields changed slightly. The 3- and 12-month benchmark yields increased—from 6.11% to 6.16% and from 6.18% to 6.22%, respectively. However, the 6-month benchmark yield fell from 6.15% to 6.12%. With the normalization of yields in recent periods, we have begun gradually increasing interest rate risk in the fund, which may prove to be a good decision if the end of the year once again brings a decline in short-term yields.

## GENERAL INFORMATION

Fund Manager:	VIG Investment Fund Management Hungary
Custodian:	Unicredit Bank Hungary Zrt.
Main distributor:	VIG Investment Fund Management Hungary
Benchmark composition:	100% ZMAX Index
ISIN code:	HU0000702303
Start:	09/25/2002
Currency:	HUF
Net Asset Value of the whole Fund:	50,683,700,427 HUF
Net Asset Value of A series:	12,712,724,467 HUF
Net Asset Value per unit:	3.081535 HUF
