

INVESTMENT POLICY OF THE FUND

The objective of the investment fund is to make the Polish bond market accessible to the investors, and to function as a relatively stable, medium-risk investment form bringing steady real yields to our Clients on middle term already, without having to tie down their money for a fixed period of time. The Fund mainly invests in Polish government securities issued in zloty, however, the portfolio manager has some room to complement the portfolio with other bond-type investments. Our goal is to achieve the highest yield while taking the lowest risk. To make investment decisions we use the tools of both fundamental and technical analysis, and we take into consideration the investor sentiment on the markets at all times. The portfolio manager seeks out potential investment opportunities based on the macro-economical expectations, the expected yield curve, the return expected on the curve and the market volatility, and selects investments that are considered to be safe and bring relatively high yields in exchange for the risks taken. The Fund strives for complete exchange risk coverage of foreign currency exposure for the target currency.

MARKET SUMMARY

Polish government bonds performed well again in November. Yields fell by 19 basis points on 3-year maturities, by 22 basis points on 5-year maturities, and by 19 basis points on 10-year maturities. At its early November rate setting meeting, the central bank cut interest rates once more, lowering the key rate by 25 basis points to 4.25%. In its new economic forecast, the central bank raised its GDP growth projection for 2026 by 0.6 percentage points to 3.7%, while lowering its inflation forecast to 3%. For 2025, the central bank expects average inflation of 3.7% and GDP growth of 3.5%. Turning to economic data, according to preliminary figures, the annual inflation rate fell in November: the Polish Statistical Office measured year-on-year inflation of 2.4%, placing the rate below the central bank's inflation target. Food price growth slowed, and lower inflationary pressure may also have come from components of the core inflation basket. Industrial production grew by 3.2% in the tenth month of the year. Retail sales were also stronger, with annual growth in October reaching 5.4%, surpassing market expectations. As for public finances, the state recorded a deficit of PLN 25,656.6 million in October, bringing the 12-month rolling budget deficit to 8.15% of GDP.
