

VIG Central European Equity Fund

PLN-IP series MONTHLY report - 2025 DECEMBER (made on: 12/31/2025)
PLN

INVESTMENT POLICY OF THE FUND

The aim of the Fund is to invest on the stock market of the Central and Eastern European Region. It is for investors who would like a share in the long-term performance of listed companies in the region. In the development of the portfolio of this Fund, the priority is to optimise the aggregate risk of the securities added to the Fund. In order to reduce risks, the Fund Manager exercises the highest degree of diligence when selecting the securities to be included in the portfolio. It analyses the risk factors of the securities, and supports its decisions with in-depth calculations.

The Fund purchases stocks issued by companies in Central and Eastern European region (primarily Hungary, the Czech Republic, Poland, Austria, Romania, secondarily Slovenia, Croatia, Slovakia), but it may also invest in the stocks of other developing and developed foreign companies as well as other collective investment securities. Due to the strategy of the Fund, it may also invest in assets denominated in foreign currency. The Fund may hedge some or all of its foreign currency risk using forward currency positions against the target currency. The Fund Manager has the discretionary right to reduce the foreign currency risk of the currency positions differing from the Fund's target currency, based on the market processes by concluding hedge transactions. In addition, the use of equity and index futures is permitted in order to effectively build the Fund's portfolio. To ensure liquidity, the Fund wishes to add government securities issued by member states of the EU, OECD, or G20 to its portfolio.

MARKET SUMMARY

The US stock markets showed restraint in December. Although lower inflation data in November initially sparked widespread buying, the Fed's cautious communication quickly dampened enthusiasm. Weak economic data did not support the expectation of a January interest rate cut. If disinflation continues, easing may occur, but it is not expected to happen quickly. Corporate reports are mixed. Sports equipment manufacturers have suffered from weakness in China, while logistics companies have benefited from cost-cutting measures. However, housing market builders continue to face challenges. As Christmas approached, small-cap stocks once again outperformed large-caps, with the Russell 2000 index significantly outperforming the S&P 500 in December. Bond yields have remained stable, and core inflation data may confirm the disinflationary trend. Investors now view AI repricing as the greatest risk for next year, while fierce competition among major companies continues. The eurozone showed signs of stagnation in December, with weak growth and stable inflation. The EU's Ukrainian financing package, implemented through joint borrowing, could bring short-term stability to the neighboring conflict. Bond yields are stable, and the euro is holding its own against the dollar. Markets are cautious. Services are keeping the economy alive while manufacturing is in recession. Analysts see potential in the relatively cheap banking sector for next year.

Central European stock markets closed November with significant gains in euro terms. In December, Austrian and Polish stocks performed particularly well, with both markets rising by more than 8% in euro terms. The Romanian stock market also performed well, while the Hungarian and Czech markets lagged somewhat behind this time. In terms of sectors, raw material producers (KGHM) were the clear winners of the month, while the more heavily weighted sectors, such as finance, retail, and oil, also performed exceptionally well. Pharmaceutical manufacturers and real estate companies, on the other hand, performed less well. The Fund performed extremely well for the year as a whole, both in absolute and relative (compared to the benchmark) terms. Despite the rise in 2025, however, it is starting 2026 in an overweight position, as a significant portion of Central European equities are still trading at a high discount compared to other markets.

GENERAL INFORMATION

Fund Manager:	VIG Investment Fund Management Hungary
Custodian:	Erste Bank Hungary Zrt.
Main distributor:	VIG Investment Fund Management Hungary
Benchmark composition:	100% CETOP 5/10/40 Index
