

INVESTMENT POLICY OF THE FUND

MARKET SUMMARY

The US stock markets showed restraint in December. Although lower inflation data in November initially sparked widespread buying, the Fed's cautious communication quickly dampened enthusiasm. Weak economic data did not support the expectation of a January interest rate cut. If disinflation continues, easing may occur, but it is not expected to happen quickly. Corporate reports are mixed. Sports equipment manufacturers have suffered from weakness in China, while logistics companies have benefited from cost-cutting measures. However, housing market builders continue to face challenges. As Christmas approached, small-cap stocks once again outperformed large-caps, with the Russell 2000 index significantly outperforming the S&P 500 in December. Bond yields have remained stable, and core inflation data may confirm the disinflationary trend. Investors now view AI repricing as the greatest risk for next year, while fierce competition among major companies continues. The eurozone showed signs of stagnation in December, with weak growth and stable inflation. The EU's Ukrainian financing package, implemented through joint borrowing, could bring short-term stability to the neighboring conflict. Bond yields are stable, and the euro is holding its own against the dollar. Markets are cautious. Services are keeping the economy alive while manufacturing is in recession. Analysts see potential in the relatively cheap banking sector for next year.

Global stock markets continued to rise in December, supported by the Federal Reserve's interest rate cut, which was in line with expectations. Regional stock indices performed exceptionally well in the last month of the year, accompanied by a favorable market environment even without the weakening of the dollar. The Hungarian stock market achieved a 1.44% return in forint terms during the month, which was in line with the performance of international stock markets, but was among the weaker performers in the region. The best-performing stocks on the BUX index were Zwack Unicum, Graphisoft Park, and OTP Bank, which has the largest weighting on the index. Among the worst-performing stocks during the month were 4iG, following its previous significant rise, while Appeninn Holding and Gránit Bank also showed significant declines.

GENERAL INFORMATION

Fund Manager:	VIG Investment Fund Management Hungary
Custodian:	Unicredit Bank Hungary Zrt.
Main distributor:	VIG Investment Fund Management Hungary
Benchmark composition:	100% BUX Index
