

# VIG Hungarian Money Market Investment Fund

A series HUF MONTHLY report - 2025 DECEMBER (made on: 12/31/2025)

## INVESTMENT POLICY OF THE FUND

The Fund's aim is to function as a stable, low-risk form of investment, while providing investors with higher returns than they could expect from bank deposits. In order to ensure liquidity, the Fund intends primarily to hold in its portfolio government bonds and discount treasury bills issued by the Government Debt Management Agency (ÁKK) and bonds issued by the National Bank of Hungary (MNB). The weighted average maturity (WAM) of the assets in the portfolio may not exceed 6 months and the weighted average life (WAL) of the assets may not exceed 12 months. The Fund may hold in its portfolio low-risk debt securities issued by banks and companies, which are expected to provide higher returns than government securities and are denominated primarily in HUF, but also in other currencies. The Fund may also invest to a limited extent in government securities or guaranteed bonds issued by the OECD or a G20 country, or any debt security issued or guaranteed by the central government or a regional or local government or the central bank of any EU Member State, or by the European Union, the European Central Bank or the European Investment Bank. The weighted average maturity (WAM) of the assets in the portfolio may not exceed 6 months and the weighted average life (WAL) of the assets may not exceed 12 months. In addition, the remaining time to maturity of each security is a maximum of 2 years and a maximum of 397 days until the nearest interest-rate determination date. The Fund may also keep its liquid assets in bank deposits. The fund may hold a limited amount of foreign currency assets in its portfolio, but only subject to the full hedging of currency risk.

VIG Moneymarket Fund is not a guaranteed investment. The risk of loss of the principal is to be borne by the investor. An investment in VIG Moneymarket Fund is different from an investment in deposits, with particular reference to the risk that the principal invested in VIG Moneymarket Fund is capable of fluctuation. VIG Moneymarket Fund does not rely on external support for guaranteeing the liquidity of the fund or stabilising the NAV per unit or share.

## MARKET SUMMARY

In December, Hungarian inflation may have decreased close to the central bank's target according to market expectations, bringing the average inflation rate for 2025 to around 4.4%. At its December rate-setting meeting, the Monetary Council again left the policy rate unchanged, so the base rate remains at 6.5%. However, the central bank's communication has changed: Central Bank Governor Mihály Varga emphasized that, compared with the previous forecast, underlying inflationary processes are expected to develop more favorably over the course of the coming year. As a result, the Council will decide on the level of the base rate on a meeting-by-meeting basis. In the December Inflation Report, the central bank significantly revised its inflation forecast for next year. The expected average inflation rate for 2026 was lowered from 3.8% to 3.2%, while the GDP growth forecast was reduced from 2.8% to 2.4%. During the month, short-term yields declined. The 3-month benchmark yield fell from 6.16% to 6.04%, the 6-month benchmark yield from 6.12% to 6.03%, and the 12-month benchmark yield from 6.23% to 6.03%. In December, we kept higher duration in the fund, which proved to be a good decision given the decline in yields.

## GENERAL INFORMATION

Fund Manager:	VIG Investment Fund Management Hungary
Custodian:	Unicredit Bank Hungary Zrt.
Main distributor:	VIG Investment Fund Management Hungary
Benchmark composition:	100% ZMAX Index
ISIN code:	HU0000702303
Start:	09/25/2002
Currency:	HUF
