

## VIG Opportunity Developed Market Equity Fund

CZKh-RP series MONTHLY report - 2025 DECEMBER (made on: 12/31/2025)  
CZK

### INVESTMENT POLICY OF THE FUND

The Fund aims to profit from the returns on global equity market investments through stock prices and dividend income. According to the intentions of the Fund Manager, the bulk of the Fund's portfolio is made up of shares of foreign companies issued through public offerings, but the Fund may also invest in shares issued by Hungarian companies. The proportion of shares that can be held in the Fund at any given time may reach the prevailing legal maximum. The Fund Manager has the option, at its own discretion, of hedging all or part of its foreign exchange risks using forward currency positions subject to observing the applicable legal requirements.

### MARKET SUMMARY

The US stock markets showed restraint in December. Although lower inflation data in November initially sparked widespread buying, the Fed's cautious communication quickly dampened enthusiasm. Weak economic data did not support the expectation of a January interest rate cut. If disinflation continues, easing may occur, but it is not expected to happen quickly. Corporate reports are mixed. Sports equipment manufacturers have suffered from weakness in China, while logistics companies have benefited from cost-cutting measures. However, housing market builders continue to face challenges. As Christmas approached, small-cap stocks once again outperformed large-caps, with the Russell 2000 index significantly outperforming the S&P 500 in December. Bond yields have remained stable, and core inflation data may confirm the disinflationary trend. Investors now view AI repricing as the greatest risk for next year, while fierce competition among major companies continues. The eurozone showed signs of stagnation in December, with weak growth and stable inflation. The EU's Ukrainian financing package, implemented through joint borrowing, could bring short-term stability to the neighboring conflict. Bond yields are stable, and the euro is holding its own against the dollar. Markets are cautious. Services are keeping the economy alive while manufacturing is in recession. Analysts see potential in the relatively cheap banking sector for next year.

The Fund achieved a positive return in December and outperformed its benchmark index. At the beginning of December, we closed our overweight position in US equities relative to European equities. In terms of individual stocks, we further increased our exposure to Novo Nordisk and maintained our positions in Pepsi and Kimberly Clark. During the month, we closed the S&P 500-Russell 2000 spread after the Russell 2000 index significantly outperformed the S&P 500 index.
