

INVESTMENT POLICY OF THE FUND

The objective of the fund is to offer to the investors calculable investment yields at low risk. The Fund Manager may exclusively invest its fund assets in bond-type assets, mainly securities issued or guaranteed by the Polish State. Furthermore, the Fund may to a limited extent invest in debt and equity securities issued or guaranteed by the European Union, or its organization, the European Central Bank or the European Investment Bank, provided that its credit rating is at least equal to that of the Polish state and is denominated in Polish zloty. Weighted average remaining duration of the assets in the portfolio of the Fund may not exceed 6 months, and the weighted average remaining life of the assets may not exceed 12 months. In addition, the remaining term of the individual securities can be no more than years, or 397 days until the next interest determination date. For the sake of liquidity, the Fund may keep its financial assets in form of bank deposit, as well. Assets of the Fund are 100% denominated in Polish zloty.

VIG Polish Moneymarket Fund is not a guaranteed investment. The risk of loss of the principal is to be borne by the investor. An investment in VIG Polish Moneymarket Fund is different from an investment in deposits, with particular reference to the risk that the principal invested in VIG Polish Moneymarket Fund is capable of fluctuation. VIG Polish Moneymarket Fund does not rely on external support for guaranteeing the liquidity of the fund or stabilising the NAV per unit or share.

MARKET SUMMARY

Polish government bonds showed mostly mixed movements in December. Activity was concentrated mainly at the short end of the yield curve, as one-year yields rose by 38 basis points, while the long end of the curve closed the month largely unchanged. At its early-December rate-setting meeting, the Polish central bank cut interest rates again, lowering the policy rate by 25 basis points to 4%. Moving on with the economic data, preliminary figures indicate that the annual inflation rate continued to decline in December. Statistics Poland measured year-on-year inflation at 2.4%, bringing the rate below the central bank's inflation target. Annual growth in food prices continued to slow, and fuel prices also declined further on a year-on-year basis. Industrial production contracted by 1.1% in the eleventh month of the year. Retail sales, although positive, increased by 3.1%, falling short of market expectations and coming in weaker than in October. The short end of the yield curve is significantly below the policy rate. If inflation continues to develop favorably, it cannot be ruled out that the central bank will continue its rate-cutting cycle that began in 2025.
