

VIG Central European Equity Fund

HUF-RP series MONTHLY report - 2026 FEBRUARY (made on: 02/28/2026)
HUF

INVESTMENT POLICY OF THE FUND

The aim of the Fund is to invest on the stock market of the Central and Eastern European Region. It is for investors who would like a share in the long-term performance of listed companies in the region. In the development of the portfolio of this Fund, the priority is to optimise the aggregate risk of the securities added to the Fund. In order to reduce risks, the Fund Manager exercises the highest degree of diligence when selecting the securities to be included in the portfolio. It analyses the risk factors of the securities, and supports its decisions with in-depth calculations.

The Fund purchases stocks issued by companies in Central and Eastern European region (primarily Hungary, the Czech Republic, Poland, Austria, Romania, secondarily Slovenia, Croatia, Slovakia), but it may also invest in the stocks of other developing and developed foreign companies as well as other collective investment securities. Due to the strategy of the Fund, it may also invest in assets denominated in foreign currency. The Fund may hedge some or all of its foreign currency risk using forward currency positions against the target currency. The Fund Manager has the discretionary right to reduce the foreign currency risk of the currency positions differing from the Fund's target currency, based on the market processes by concluding hedge transactions. In addition, the use of equity and index futures is permitted in order to effectively build the Fund's portfolio. To ensure liquidity, the Fund wishes to add government securities issued by member states of the EU, OECD, or G20 to its portfolio.

MARKET SUMMARY

In February, the S&P 500 index declined slightly, while the VIX (the volatility index) remained at a consistently high level, indicating a strong sector rotation within the index. Nvidia's quarterly revenue exceeded expectations, but the subdued market reaction suggests that the positive surprise was already priced in. In terms of monetary policy, Kevin Warsh's nomination as Fed chair fundamentally rewrote interest rate expectations, shifting market attention from the short-term interest rate path to the possible reduction of the central bank's \$6.6 trillion balance sheet. Futures markets are currently pricing in two cuts for 2026, with the first move expected to be postponed until June-July. The yield curve has stabilized at around 4.1% on 10-year bonds. On the geopolitical front, the resumption of US-Iran nuclear talks, Iran's 15-day ultimatum, and the concentration of forces in the Middle East have pushed up oil prices. European stock markets significantly outperformed the US, fueled by favorable valuations, a strong earnings season, and political commitment to increase defense spending. The ECB is expected to continue its easing cycle, but news of ECB President Lagarde's possible early departure raises some uncertainty about the continuity of institutional communication.

Central and Eastern European stock markets showed two sides in February. In the first half of the month, the global rotation from large US technology stocks to value and real economy sectors clearly worked in the region's favor: the BUX index rose to a new all-time high in early February, mainly due to the strong performance of OTP Bank, the Polish WIG20 also performed well, and investor inflows into the CEE region remained strong. The region benefits from the fact that Central European markets are dominated by the financial, energy and consumer sectors, precisely those sectors into which global investors are rotating at the expense of the technology-heavy US market.

However, market sentiment reversed in the second half of the month. Trade uncertainty was generated when the Supreme Court ruled on February 20 that Trump's tariffs were unconstitutional, prompting Trump to impose a 15% global retaliatory tariff, which also affected export-dependent Central European industry. Despite the correction at the end of the month, the BUX is still up nearly 35% for the year, reflecting the fundamental strength of the region.

In February, we realized profits on our CEZ position. We were also active in the Romanian market, particularly in our Banca Transilvania and BRD positions. At the country allocation level, we maintain our overweight position in the Polish and Hungarian markets, while we have moved to an underweight position in the Czech and Romanian markets, partly as a result of the above-mentioned profit-taking.

GENERAL INFORMATION

Fund Manager:	VIG Investment Fund Management Hungary
Custodian:	Erste Bank Hungary Zrt.
Main distributor:	VIG Investment Fund Management Hungary
Benchmark composition:	100% CETOP 5/10/40 Index
ISIN code:	HU0000702501
Start:	03/16/1998
