

VIG Developed Markets Government Bond Investment Fund

A series HUF MONTHLY report - 2026 FEBRUARY (made on: 02/28/2026)

INVESTMENT POLICY OF THE FUND

The objective of the Fund is to create a highly defensive investment portfolio for its Investors, which typically invests in developed-market government bonds and related exchange-traded derivatives. According to the intentions of the Fund Manager, the bulk of the Fund's portfolio is made up of bonds issued by foreign states and foreign companies through public offerings. With regard to foreign securities, the Fund only purchases publicly traded securities listed on a foreign stock exchange. It keeps the planned share of non-investment grade securities low. The proportion of bonds that can be held in the Fund at any given time may reach the prevailing legal maximum. In order to ensure liquidity, the Fund may purchase Hungarian government securities (primarily discount treasury bills) and MNB bonds. The Fund Manager has the option, at its own discretion, of hedging all or part of its foreign exchange risks using forward currency positions subject to observing the applicable legal requirements.

MARKET SUMMARY

In February, the S&P 500 index declined slightly, while the VIX (the volatility index) remained at a consistently high level, indicating a strong sector rotation within the index. Nvidia's quarterly revenue exceeded expectations, but the subdued market reaction suggests that the positive surprise was already priced in. In terms of monetary policy, Kevin Warsh's nomination as Fed chair fundamentally rewrote interest rate expectations, shifting market attention from the short-term interest rate path to the possible reduction of the central bank's \$6.6 trillion balance sheet. Futures markets are currently pricing in two cuts for 2026, with the first move expected to be postponed until June-July. The yield curve has stabilized at around 4.1% on 10-year bonds. On the geopolitical front, the resumption of US-Iran nuclear talks, Iran's 15-day ultimatum, and the concentration of forces in the Middle East have pushed up oil prices. European stock markets significantly outperformed the US, fueled by favorable valuations, a strong earnings season, and political commitment to increase defense spending. The ECB is expected to continue its easing cycle, but news of ECB President Lagarde's possible early departure raises some uncertainty about the continuity of institutional communication.

Following the weakness observed in January, government bond yields in the United States declined by 5– 15 basis points along the yield curve in February. Regarding the portfolio composition of the Fund, we replaced 2-year U.S. Treasury holdings with 5-year maturities, as the yield curve offered a favourable premium for extending duration. In addition, we purchased Turkish bank bonds in smaller amounts for the portfolio. These securities are less liquid and carry weaker credit ratings, but offer significantly higher yield spreads.

GENERAL INFORMATION

Fund Manager:	VIG Investment Fund Management Hungary
Custodian:	Erste Bank Hungary Zrt.
Main distributor:	VIG Investment Fund Management Hungary
Benchmark composition:	100% Bloomberg Global Treasury Majors ex Japan Total Return Index Unhedged USD
