

INVESTMENT POLICY OF THE FUND

The Fund's objective is to establish a portfolio for its Investors that generates positive returns - higher than the yields available on the domestic money market - under all circumstances, i.e. the Fund pursues a "total return" strategy. The Fund seeks to achieve this goal by selecting, through various analytical techniques, the asset classes and investment funds that have the greatest price growth potential and make investments through the purchase of investment units and collective investment securities. The Fund invests primarily in investment funds managed by VIG Befektetési Alapkezelő Magyarország Zrt., but may also purchase other investment funds and collective investment securities in its portfolio for diversification purposes or if the given asset class is not yet covered by the Fund Manager's funds. In order to ensure liquidity, the Fund may hold in its portfolio discount treasury bills and government bonds issued by the Government Debt Management Agency (ÁKK), interest-bearing securities guaranteed by the Hungarian State, and bonds issued by the MNB. As the range of possible investments includes investments denominated in foreign currency, ETFs and investment units, the Fund's investors may also bear some foreign exchange risk. According to the Fund's investment policy, it invests or may invest more than 80 percent of its assets in investment units or other securities issued by a collective investment undertaking. However, the Fund does not intend to hold more than 20% weight in any one investment fund, except for the VIG Hungarian Money Market Fund, VIG Hungarian Bond Fund, VIGMoneyMaxx Emerging Market Total Return Fund, VIG Alfa Absolute Investment Fund, VIG Bondmaxx Total Return Bond Fund, VIG Maraton ESG Multi Asset Fund, VIG Panoráma Total Return Fund and VIG Ózon Annual Capital Protected Fund, the weight of which may be as much as 100% within the Fund's portfolio.

MARKET SUMMARY

The Fund's share price rose slightly in February. The month was a real rollercoaster ride on the US stock market, where news about artificial intelligence and political developments drove share prices. Macroeconomic indicators presented a mixed picture. Retail sales remained unchanged, while the labor market report was rather positive. The unemployment rate was 4.3% and the consumer price index (CPI) eased; however, producer price inflation remained high. The minutes of the Monetary Policy Council meeting left open the possibility of an interest rate hike, while President Trump nominated Kevin Warsh, who is committed to lowering interest rates, as the new chairman of the central bank. Political volatility was further heightened when the Supreme Court overturned tariffs that were to take effect in 2025, prompting President Trump to impose new import tariffs of around 10%. The suspension of redemptions by Blue Owl, a private credit fund that mainly lends to software development companies, drew attention to business models that are being disrupted by the rise of AI, such as software development and financial and tax consulting, causing a significant decline in the share prices of companies involved in these areas. European equities benefited from investors turning away from the software sector and toward more traditional areas. Growing geopolitical tensions between the United States and Iran sparked renewed interest in European defense companies such as Rolls-Royce and Saab. Among our absolute return funds, the Panorama Fund, which has the largest commodity market exposure, achieved a positive return during the month thanks to the surge in oil prices caused by the possibility of a US-Iran confrontation. Our absolute return funds with equity exposure (Alfa, Maraton) and smart beta strategies lost slightly in value due to the stock market correction that unfolded at the end of the month.
