MONTHLY report - 2026 FEBRUARY (made on: 02/28/2026)

INVESTMENT POLICY OF THE FUND

MARKET SUMMARY

In February, Swiss inflation remained unchanged, with the annual rate of price increases staying at 0.1% year-on-year. On a month-on-month basis, however, prices rose by 0.6%. Food prices increased by 0.3% annually, while energy prices continue to decline, falling by 4.4% year-on-year. Since the beginning of 2026, the Swiss franc has strengthened again, a trend further reinforced by the Iranian conflict that erupted over the weekend. The rise in oil prices due to the conflict poses an upside risk to the inflation path; however, the stronger Swiss franc works in the direction of lower inflation. The first interest rate decision of the year will take place in March, and according to market expectations the policy rate will remain unchanged. The Swiss National Bank continues to prefer foreign exchange market interventions rather than cutting the policy rate below 0%. During February, economic activity increased, with the economic barometer of the KOF Swiss Economic Institute rising to 104.2 points. In Switzerland, short-term bond yields increased slightly in February. At the one-year maturity, yields are around -10 basis points, while at the three-year maturity yields rose by 5 basis points, bringing them also to around -10 basis points.
