

VIG Hungarian Money Market Investment Fund

A series HUF MONTHLY report - 2026 MARCH (made on: 03/31/2026)

INVESTMENT POLICY OF THE FUND

The Fund's aim is to function as a stable, low-risk form of investment, while providing investors with higher returns than they could expect from bank deposits. In order to ensure liquidity, the Fund intends primarily to hold in its portfolio government bonds and discount treasury bills issued by the Government Debt Management Agency (ÁKK) and bonds issued by the National Bank of Hungary (MNB). The weighted average maturity (WAM) of the assets in the portfolio may not exceed 6 months and the weighted average life (WAL) of the assets may not exceed 12 months. The Fund may hold in its portfolio low-risk debt securities issued by banks and companies, which are expected to provide higher returns than government securities and are denominated primarily in HUF, but also in other currencies. The Fund may also invest to a limited extent in government securities or guaranteed bonds issued by the OECD or a G20 country, or any debt security issued or guaranteed by the central government or a regional or local government or the central bank of any EU Member State, or by the European Union, the European Central Bank or the European Investment Bank. The weighted average maturity (WAM) of the assets in the portfolio may not exceed 6 months and the weighted average life (WAL) of the assets may not exceed 12 months. In addition, the remaining time to maturity of each security is a maximum of 2 years and a maximum of 397 days until the nearest interest-rate determination date. The Fund may also keep its liquid assets in bank deposits. The fund may hold a limited amount of foreign currency assets in its portfolio, but only subject to the full hedging of currency risk.

VIG Moneymarket Fund is not a guaranteed investment. The risk of loss of the principal is to be borne by the investor. An investment in VIG Moneymarket Fund is different from an investment in deposits, with particular reference to the risk that the principal invested in VIG Moneymarket Fund is capable of fluctuation. VIG Moneymarket Fund does not rely on external support for guaranteeing the liquidity of the fund or stabilising the NAV per unit or share.

MARKET SUMMARY

The Iranian conflict that broke out at the end of February and has continued since then shaped the performance of bond markets in March. Rising global oil prices led to increasing inflation concerns, which in turn resulted in higher bond yields. In the Central and Eastern European region, a significant yield increase of 50– 100 basis points was observed. In Hungary, short-term yields rose from around 6% to nearly 7% due to the war, before declining somewhat later. Instead of the previously expected 3– 4 rate cuts, the market is now pricing in 3 rate hikes for 2026. Following the rate cut in February, the Monetary Council left the base rate unchanged in March, keeping it at 6.25%. Due to rising oil prices, the Hungarian government has reintroduced a fuel price cap for an indefinite period. Nevertheless, inflation in March may have returned to an upward trend according to market expectations, as although fuel prices do not increase further in Hungary, a monthly price rise of 5– 6% was still observed at petrol stations. Geopolitical tensions have increased uncertainty, and the outcome of the war remains unclear. Short-term yields are currently above the policy rate, which could represent an attractive level if the conflict is resolved in the short term.

GENERAL INFORMATION

Fund Manager:	VIG Investment Fund Management Hungary
Custodian:	Unicredit Bank Hungary Zrt.
Main distributor:	VIG Investment Fund Management Hungary
Benchmark composition:	100% ZMAX Index
