

VIG InnovationTrend ESG Equity Fund

CZKh-R series MONTHLY report - 2026 MARCH (made on: 03/31/2026)
CZK

INVESTMENT POLICY OF THE FUND

The purpose of the investment fund is to create an equity fund that seeks to benefit from innovation in various industries. The Fund aims to achieve long-term capital growth by investing in global companies that are at the forefront of the use of disruptive technologies and can thus play a leading role in their industries. Disruptive technology refers to innovations or developments that significantly change or disrupt existing industries, business models, products or services. Such trends include, for example, big data (artificial intelligence, cyber security, quantum computers), e-mobility (electric cars and related battery technologies), digitisation and related entertainment (metaverse, e-sports) and, last but not least, fintech and robotics industry breakthroughs.

The Fund aims to achieve its objectives through equity-type instruments, primarily exchange-traded funds (ETFs), equities and open-ended public investment funds. The Fund takes a forward-looking approach and actively seeks companies in industries that show potential for growth through technological innovation. Investments are made in companies that have strong fundamentals and are capable of long-term value creation and achieving competitive advantage through innovation. The investment philosophy is based on the belief that innovation is a key driver of long-term business success and shareholder value. Trends related to technological innovation are long-term processes that extend beyond normal economic cycles and are generally global and affect the entire world. Consequently, the Fund is not subject to any geographical restrictions. Since the Fund aims to profit from long-term growth and has significant exposure to the equity market, we recommend the Fund to investors who want to invest in the longer term and have a relatively high willingness to take risk.

MARKET SUMMARY

In March, global stock markets were dominated by the escalation of the U.S.-Iran armed conflict that erupted in late February. The near-total closure of the Strait of Hormuz and mutual attacks on energy infrastructure painted a stagflationary scenario: The price of Brent crude oil rose by more than 70% in March, surpassing \$100 per barrel—a level not seen since August 2022. The S&P 500 fell nearly 5%, and the Nasdaq entered correction territory, dropping more than 10% from its peak. The Fed left its benchmark interest rate unchanged in the 3.50–3.75% range, and the likelihood of the next rate cut has virtually disappeared. The energy sector was the only one to close March in positive territory, rising nearly 10%, while the technology, communications, and discretionary consumer sectors were among the biggest losers.

The Fund's focus sectors were particularly hard hit this month. Within the technology sector, the decline of software service providers continued: the spread of autonomous AI agents and workflow automation tools continues to fundamentally challenge the traditional SaaS (Software as a Service) business model. The Magnificent Seven group was down 16% year-to-date, with Microsoft falling 26% from the start of the year due to capital investment uncertainty and competitive pressure from AI startups, underperforming the S&P 500 for the eighth consecutive month. In the semiconductor sector, the relative strength seen previously has faltered: while structural demand for AI infrastructure remains, geopolitical shocks and stagflation fears have put pressure on the sector as a whole. The approximately \$600–650 billion in AI capital expenditures projected by hyperscale companies through 2026 raises increasing questions about the timing of returns, particularly in a slowing economic environment. The first-quarter earnings season in April is expected to be one of the most important catalysts for the Fund. The results of major hyperscalers and software providers may provide insight into whether the momentum of the AI investment cycle can be sustained amid heightened macroeconomic risks. In addition, developments in the Iran conflict may remain in the spotlight, as a potential ceasefire could positively impact the technology sector by improving risk appetite. The Fed's interest rate decision at the end of April and the approaching 150-day deadline for Trump's 15% global tariff could be additional sources of uncertainty. In March, we slightly reduced the Fund's equity exposure, increasing the weighting only for Microsoft, where we began to feel the decline was excessive.

GENERAL INFORMATION

Fund Manager:	VIG Investment Fund Management Hungary
Custodian:	Erste Bank Hungary Zrt.
Main distributor:	VIG Investment Fund Management Hungary
Benchmark composition:	Fund has no benchmark
ISIN code:	HU0000732995
Start:	05/02/2024
Currency:	CZK
Net Asset Value of the whole Fund:	22,121,170 USD
Net Asset Value of CZKh-R series:	11,646,512 CZK
